Sustaining Rural Systems Holly R. Barcus, William G. Moseley, 2023-03-21 This book examines the interplay between rural places and the competing narratives of globalization and nationalism Through case studies from Croatia Belgium Australia the USA Argentina Bolivia Ecuador Mexico Italy and Spain this volume highlights the contemporary status of rural change through the lens of sustainability and set within current competing narratives of globalization and economic nationalism The multiplicity of roles that rural communities play in economic and social systems are often overlooked in conversations about globalization and

economic nationalism Yet rural communities economies and landscapes are closely tied to global industries migrant flows and markets while simultaneously subject to nationalist economic policies and strategies The chapters in this book seek to elucidate the nuanced ties between people and industries that are at once intensely local and simultaneously tied to regional and global processes The volume challenges us to critically examine oversimplified messaging of highly complex systems and provides insights into processes of change at local scales across major global regions Sustaining Rural Systems will be of great interest to upper level students researchers and scholars in the areas of rural sociology human geography and development studies The chapters in this book were originally published as a special issue of the Geographical Review
