

Why did we ... embark upon 'comprehensive design' embracing architecture as well as all branches of the relevant engineering disciplines? The answers can perhaps be abstracted from my many papers, published or unpublished, which deal with what could be called my **'philosophy of design'** and the crucial role 'design' plays in the affairs of mankind.

Miles Keeping, David Shiers

Ove Arup Philosophy Of Design:

Ove Arup Ove Nyquist Arup, 2012 Featuring a number of essays published for the first time this collection of writings by the inspirational structural engineer Ove Arup provides valuable insight into one of the greatest minds the field has witnessed The founder of the eponymous engineering firm which continues to realize seminal projects around the world Ove Arup is widely acknowledged as one of the most significant engineers of his time Generated over the course of his illustrious career these lectures essays and interviews broadly share several themes insight into Arup's thinking on the nature of good design quality and value in the built environment and the growing need for better collaboration between engineers architects and contractors in order to exploit technological advances in materials and methods while at the same time reducing the environmental impact of building These chronologically arranged essays span five decades and many of the themes they address are as relevant today as they were when first produced Illustrating wisdom practical problem solving and Arup's philosophical approach this book is a necessary and long overdue addition to the library of anyone who has a passion for and an interest in the principles of great design ILLUSTRATIONS 16

Building Theories Franca Trubiano, 2022-11-25 *Building Theories* speaks to the value of words in architecture It addresses the author's fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this *Building Theories* argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de Mézières Boullée Laugier Rondelet Semper Viollet le Duc Hebsch Betticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas *Building Theories* considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of *techné* with a dual commitment to *fabrica* e *ratio* with a productive return to *l'art de bien bastir* with the accurate translation of the term *Baukunst* and with an appeal to the architect's composite mind Students practitioners and educators will identify in *Building Theories* ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material transformations have always been at the origins of built form

Philosophy and Engineering: Reflections on Practice, Principles and Process Diane P Michelfelder,Natasha McCarthy,David E. Goldberg,2014-01-13 Building on the breakthrough text Philosophy and Engineering An Emerging Agenda this book offers 30 chapters covering conceptual and substantive developments in the philosophy of engineering along with a series of critical reflections by engineering practitioners The volume demonstrates how reflective engineering can contribute to a better understanding of engineering identity and explores how integrating

engineering and philosophy could lead to innovation in engineering methods design and education The volume is divided into reflections on practice principles and process each of which challenges prevalent assumptions and commitments within engineering and philosophy The volume explores the ontological and epistemological dimensions of engineering and exposes the falsity of the commonly held belief that the field is simply the application of science knowledge to problem solving Above all the perspectives collected here demonstrate the value of a constructive dialogue between engineering and philosophy and show how collaboration between the disciplines casts light on longstanding problems from both sides The chapters in this volume are from a diverse and international body of authors including philosophers and engineers and represent a highly select group of papers originally presented in three different conferences These are the 2008 Workshop on Philosophy and Engineering WPE 2008 held at the Royal Academy of Engineering the 2009 meeting of the Society for Philosophy and Technology SPT 2009 at the University of Twente in the Netherlands and the Forum on Philosophy Engineering and Technology fPET 2010 held in Golden Colorado at the Colorado School of Mines

Material Imagination in Architecture

David Dernie, Jacopo Gaspari, 2016-07-07 Material Imagination in Architecture draws on history and the visual arts and contemporary architecture to explore this popular theme in architectural practice and education In the context of a discipline increasingly driven by digital production this text explores architecture and making and the diverse influences on the material reality of architectural form it argues that the crafts fabrication and assemblage of its making remain vital elements of contemporary architectural language This broad ranging text bridges the gap between a technical or otherwise fragmentary knowledge of materials of the specialist and the tacit or instinctive understanding of materials that the artist sculptor or architect may have It identifies key material themes pertinent to contemporary architectural debate and develops a discourse about future practice that is framed by environmental imperatives and grounded in a historical understanding of the meaning and use of materials Material iconology in architecture is a well established tradition and this book draws on that background to investigate the possibilities and limits of using materials in contemporary design to communicate the themes and contexts of an architectural project a material's relationship to context and to the history of practices that belong to the traditions of making buildings Each theme is explored in case studies from twelve countries around the world including the UK USA Spain Italy Germany Australia and China

The Collaborators: Interactions in the Architectural Design Process

Gilbert Herbert, Mark Donchin, 2016-03-23 Illustrated by critical analyses of significant buildings including examples by such eminent architects as Adler and Sullivan Erich Mendelsohn and Louis Kahn this book examines collaboration in the architectural design process over a period ranging from the mid 19th century to the late 1960s The examples chosen located in England the United States Israel and South Africa are of international scope They have intrinsic interest as works of architecture and illustrate all facets of collaboration involving architects engineers and clients Prior to dealing with the case studies the theoretical framework is set in three introductory essays which discuss in general terms the

organizational implications of partnerships associations and teams the nature of interactions between architect and engineer and cooperation and confrontation in the relationship between architect and client From this original standpoint the interactive role of the designers it examines and reinterprets such well known buildings as the Chicago Auditorium and the Kimbell Art Museum The re evaluation of St Pancras Station and its hotel questions common presumptions about the separation of professional roles played by its engineer and architect The account of the troubled history of Mendelsohn's project for the first Haifa Power House highlights the difficulties that arise when a determined and eminent architect confronts a powerful and demanding client In a later era the examination of the John Moffat Building which is less well known but deserving of wider recognition reveals how the fruitful collaboration of multiple architects can result in a successful unified design These case studies comprise a wide range of programmes challenges personalities and interactions Ultimately in five different ways in five different epochs and in five different circumstantial and cultural contexts this book shows how the dialogue between the players in the design process resonates upo

Berthold Lubetkin John Allan, 2023-09-15 This book presents a compact and compelling account of the life and work of Berthold Lubetkin 1901 1990 widely regarded as the outstanding architect of his generation to practise in England It explores the key themes achievements and setbacks of his career drawing from the author's twenty year personal friendship with Lubetkin himself from discussions with former colleagues and from his direct experience of working with many of Lubetkin's buildings as a conservation architect The study reveals the significance of Lubetkin's Russian origins and European travels re assesses his prime work of the 1930s and charts the extensive output of his often overlooked post war career It also considers Lubetkin's legacy in the later work of his key associates several of whom became significant architects in their own right Lubetkin is a legendary figure in architectural circles while still remaining slightly mysterious and misunderstood The author shines new light on the man and his ideas and assesses his unique place in modern architectural history Illustrations include original black white images as well as high quality colour studies of the buildings as they are now A complete List of Works and published commentaries also provide a valuable source of reference

Sustainable Building Design Miles Keeping, David Shiers, 2017-10-17 An inside view of how one of the world's leading architecture and engineering practice does business Sustainable Built Environments Principles and Practice offers detailed environmentally sound design solutions to a wide range of building engineering challenges The text uses case examples and project data provided by engineers and designers at Arup Associates It covers a broad range of relevant issues with focused commentaries and explanations presented in an accessible format for use by students busy practitioners and informed clients Whilst this book stresses the importance of a unified approach to design the text is divided into six principal chapters each addressing an important aspect of sustainable architecture and engineering These chapters Master Planning Transport Energy The Building Envelope Environmental Services and Materials may be read on their own or in sequence as part of a narrative Throughout the book photographs

architectural and engineering drawings and diagrams examples and other data illustrate the case studies Numerous web links are provided to additional information This inspirational book Focuses on the work of Arup Associates the award winning architectural and engineering practice Uses real life examples of functioning buildings and structures to provide information and guidance on the development of sustainable solutions Is packed with informative illustrations Sustainable Built Environments Principles and Practice is a unique text that will inform and inspire architects and engineers as well as students of those disciplines around the globe

Collaborations in Architecture and Engineering Clare Olsen, Sinead Mac Namara, 2021-12-30 This new edition of Collaborations in Architecture and Engineering explores how to effectively develop creative collaborations among architects and engineers The authors an architect and an engineer share insights gained from their experiences and research on fostering productive communication engaging in interdisciplinary discussions and establishing common design goals Together they share the tools methods and best practices deployed by prominent innovative architects and engineers to provide readers with the key elements for success in interdisciplinary design collaborations The book offers engaging stories about prominent architect and engineer collaborations such as those between SANAA and Sasaki and Partners Adjaye Associates and Silman Grafton Architects and AKT II Studio Gang and Arup Foster Partners and Buro Happold Steven Holl Architects and Guy Nordenson and Associates and among the engineers and architects at SOM In the second edition the newly added case studies showcase extraordinary buildings across the globe at a range of scales and typologies tracing the facets of high quality collaborations Through the examples of these remarkable synergies readers gain insights into innovative design processes that address complex challenges in the built environment The second edition of Collaborations in Architecture and Engineering is a terrific sourcebook for students educators and professionals interested in integrative design practice among the disciplines
