Corporate marketing: insights and integration drawn from corporate branding corporate identity corporate communication and visual identification ,2006 The Silent Takeover Noreena Hertz,2013-11-30 The way we are governed is changing so is our economy Government has less and less power to influence how we live our lives while the private sector has more power than ever to control what we do and what we think Yet the business pages of the newspapers still come as a supplement while the activities of governments dominate the front pages and the headlines To understand the new world in which we are living we need to learn to challenge long held assumptions about the nature of power in society The Silent Takeover is an essential guide to that new understanding as we progress through the 21st century a time in which we can no longer rely on politicians of whatever stripe to meet our needs a time in which business rather than political parties offers the way forward a time in which we can make more of an impact through our pockets than we have ever done through the ballot box In the wake of an economic recession Hertz s eye opening book reveals much about early 21st century politics and its effects on society Africa in the Colonial Ages of Empire Tatah Mentan,2017-12-17 Words like colonialism and empire were once frowned upon in the U S and other Western mainstream media as worn out left wing rhetoric that didnt fit reality Not anymore Tatah Mentan observes that a growing chorus of right wing ideologues with close ties to the Western administrations war making hawks in NATO are encouraging Washington and the rest of Europe to take pride in the expansion of their power over people and nations around the globe Africa in the Colonial Ages of Empire is written from the perspective that the scholarly lives of academics researching on Africa are changing constantly in flux and increasingly bound to the demands of Western colonial imperialism This existential situation has forced the continent to morph into a tool in the hands of Colonial Empire According to Tatah Mentan the effects of this existential situation of Africa compel serious academic scrutiny At the same time inquiry into the African predicament has been changing and evolving within and against the rhythms of this new normal of Colonial Empire Old or New The author insists that the long and bloody history of imperial conquest that began with the dawn of capitalism needs critical scholarly examination As Marx wrote in Capital The discovery of gold and silver in America the extirpation enslavement and entombment in mines of the aboriginal population the beginning of the conquest and looting of the East Indies the turning of Africa into a warren for the commercial hunting of black skins signaled the rosy dawn of the era of capitalist production These idyllic proceedings are the chief moment of primitive accumulation Africa in the Colonial Ages of Empire is therefore a MUST READ for faculty students as well as policy makers alike in the changing dynamics of their profession be it theoretically methodologically or structurally and materially

Handbook of Management Communication François Cooren, Peter Stücheli-Herlach, 2021-08-23 Management communication encompasses a wide range of practices that define modern organizations Those practices are in many respects constituted formed and contextualized by the use of language This handbook traces the theoretical modelling of these practices by contemporary research It explores their linguistic features and performance in specific situations of value creation and in various modes It is a companion for students and scholars of applied linguistics and organizational communication as well as management and strategy research Arts Management

Management Derrick Chong, 2009-12-18 The second edition of Arts Management has been thoroughly revised to provide an updated comprehensive overview of this fast changing subject Arts managers and students alike are offered a lively sophisticated insight into the artistic managerial and social responsibilities necessary for those working in the field With new cases studies and several new chapters Derrick Chong takes an interdisciplinary approach in examining some of the main impulses informing discussions on the management of arts and cultural organizations These are highly charged debates since arts managers are expected to reconcile managerial economic and aesthetic objectives Topics include arts and the State with reference to the instrumentalism of the arts and culture business and the arts ownership and control of arts organizations arts consumption and consumers including audience development and arts marketing managing for excellence and artistic integrity financial investing in the arts namely fine arts funds and theatre angels philosophies of philanthropy Incorporating a deliberately diverse range of sources Arts Management is essential reading for students on arts management courses and provides valuable insights for managers already facing the management challenges of this field

International Business Luke Ike, 2017-02-03 This book is about international business international firms their business activities across borders the environment in which they operate and management The book produces a clear and concise introduction to international business setting a global standard for studying and understanding of international business as required by practicing managers and those in colleges and universities who are aspiring to become international business managers

The Gender Effect Kathryn Moeller, 2018-02-23 How and why are U S transnational corporations investing in the lives educations and futures of poor racialized girls and women in the Global South Is it a solution to ending poverty Or is it a pursuit of economic growth and corporate profit Drawing on more than a decade of research in the United States and Brazil this book focuses on how the philanthropic social responsibility and business practices of various corporations use a logic of development that positions girls and women as instruments of poverty alleviation and new frontiers for capitalist accumulation Using the Girl Effect the philanthropic brand of Nike Inc as a central case study the book examines how these corporations seek to address the problems of gendered poverty and inequality yet do so using an instrumental logic that shifts the burden of development onto girls and women without transforming the structural conditions that produce poverty

These practices in turn enable corporations to expand their legitimacy authority and reach while sidestepping contradictions in their business practices that often exacerbate conditions of vulnerability for girls and women. With a keen eye towards justice, author Kathryn Moeller concludes that these corporatized development practices de-politicize girls and women's demands for fair labor practices and a just global economy.
