No Place Like Utopia Modern Architecture And The Company We Kept:

No Place Like Utopia Peter Blake, 1993 For more than half a century Peter Blake has lived in the mainstream of contemporary architecture and art As writer magazine editor critic and practicing architect he has numbered among his friends and acquaintances and occasionally enemies virtually all of the major figures of modern architecture and a good many famous artists as well In this crisp and lively memoir he brings them and the time he shared with them vividly and memorably to life The anecdotes are memorable Here is Frank Lloyd Wright regarded by Blake as a perfect example of the Artist as Ham though he greatly admired his buildings exploding at the discovery of young Blake s savage review of his Autobiography Bertrand Russell trying to escape visitors by hiding up a tree in Pennsylvania as he calmly puffs away on his pipe Buckminster Fuller tap dancing on a drafting table to demonstrate the metrical affinity between bebop and a new mathematical system he is working on Mies van der Rohe at work stolidly gazing at a model of an ITT building while assistants scurry around making alterations Marcel Breuer telling how he invented his famous chair Philip Johnson delightedly answering a solemn question about heat loss from a visitor to his glass house The heat loss is absolutely tremendous and beaming from ear to ear But No Place Like Utopia also has a deeper theme how modern architecture born and raised between the wars and after with a strong sense of social and political idealism in the 1960s gradually fell back into its ancient role as an elitist pursuit dedicated to flattering the rich and powerful Only now as Blake makes clear can we see the beginnings of a return to its original principles From the push and pull of politics culminating in the witch hunts of the McCarthy period to heady days in the magazine business first with *Architectural Forum* and then with the brilliant but ultimately doomed *Architecture Plus* Peter Blake has always been energetically involved with his art and with his era No Place Like Utopia is thus doubly valuable as a wonderfully readable historical and personal document and a pungent commentary on where modern architecture went wrong and right **BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved**

U.S. International Exhibitions during the Cold War Andrew James Wulf, 2015-01-30 Although cultural diplomacy has become an increasingly fashionable term embraced by academics foreign service personnel and private sector commercial and cultural interests the very practice of this idea remains conspicuously challenging to define This book takes on this problem advancing a new understanding of cultural diplomacy that results from a historical investigation of a single area of government and private sector partnership and what became in the mid twentieth century the most prominent manifestation of this alliance the cultural exhibitions sent abroad to tell America s story with the goal of winning hearts and minds To illustrate this point selected exhibitions and the intentions of the policymakers who proposed them are interrogated for the first time beside archival documentation writings

from the history of design advertising science as well as art historical and museum studies theories that address various aspects of the history of collecting and display all of which explore the reality of how these exhibitions were conceived and prepared for foreign audiences Most importantly personal interviews with the designers and government representatives responsible for the ultimate appearance of these events upturn preconceived notions of how these events came to be Seventy five photographs from the exhibits make this history come alive Through this discussion these questions are answered What was America showing of itself through these exhibitions And more urgently what do these exhibitions tell us about U S interest in verisimilitude This investigation spans the crucial years of American exhibitions abroad 1955 1975 beginning with the formation of an official system of exhibiting American commercial wares and political ideas at trade fairs through official exchanges with the U S S R to pavilions at world s fairs and finally to museum exhibitions that signaled a return to the display of founding American values They are thus complex ideological symbols in which concepts of national identity globalization technology consumerism design and image management both coincided and clashed The investigation of these exhibitions enhances the understanding of a significant chapter of U S cultural diplomacy at the height of the Cold War and how America constantly reimagined itself
