No Startup Hipsters Samir Rath, Teodora Georgieva, 2014-12-13 The innovation ecosystem around the world is getting clogged up Looking around us there are numerous problems like polluted cities obesity health care access to education water supply and the list goes on Sadly much of the technology being built even in leading startup ecosystems around the world is short sighted and focused on quick profitability rather than solving problems that millions face on a daily basis This book is a call to return to basics and focus on innovation around actual problems that the normal person faces in his life around the world We present a systematic approach to building early stage technology companies We provide a collection of experiential decision frameworks that draw their academic credentials from design thinking operational research business strategy and microeconomics We do not believe in generic advice We enable entrepreneurs to figure out the strategies and tactics that would work for them in their local context for the specific problem that they are trying to solve Subsequently we outline more strategic information on understanding the suitability of the business model to the local innovation ecosystem and ways to scale with finance We conclude the book with philosophical thoughts on our observations of the role of the entrepreneur in our economic system and the motivations of building a technology startup

COMPANY IS NOBODY BUILDING The next Bill Gates will not build an operating system The next Larry Page or Sergey Brin won't make a search engine If you are copying these guys you aren't learning from them It's easier to copy a model than to make something new doing what we already know how to do takes the world from 1 to n adding more of something familiar Every new creation goes from 0 to 1 This book is about how to get there Peter Thiel has built multiple breakthrough companies and Zero to One shows how ELON MUSK CEO of SpaceX and Tesla This book delivers completely new and refreshing ideas on how to create value in the world MARK ZUCKERBERG CEO of Facebook When a risk taker writes a book read it In the case of Peter Thiel read it twice Or to be safe three times This is a classic NASSIM NICHOLAS TALEB author of The Black Swan

Zero to One Peter A. Thiel,2018 1 NEW YORK TIMES BESTSELLER If you want to build a better future you must believe in secrets The great secret of our time is that there are still uncharted frontiers to explore and new inventions to create In Zero to One legendary entrepreneur and investor Peter Thiel shows how we can find singular ways to create those new things Thiel begins with the contrarian premise that we live in an age of technological stagnation even if we're too distracted by shiny mobile devices to notice Information technology has improved rapidly but there is no reason why progress should be limited to computers or Silicon Valley Progress can be achieved in any industry or area of business It comes from the most important skill that every leader must master learning to think for yourself Doing what someone else already knows how to do takes the world from 1 to n adding more of something familiar But when you do something new you go from 0 to 1 The next Bill Gates will not build an operating system The next Larry Page or Sergey Brin won't make a search engine Tomorrow's champions will not win by competing ruthlessly in today's marketplace They will escape competition altogether because their businesses will be unique Zero to One presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation it starts by learning to ask the questions that lead you to find value in unexpected places
