No More Summer Reading Loss Not This But That:

Summer Reading Richard L. Allington, Anne McGill-Franzen, 2018-07-06 Summer reading loss accounts for roughly 80 percent of the rich poor reading achievement gap Yet far too little attention is given to this pressing problem This timely volume now offers not only a comprehensive review of what is known about summer reading loss but also provides reliable interventions and guidance Written by acknowledged experts and researchers on reading remedial reading and special education this collection describes multiple models of innovative summer reading and book distribution initiatives as well as research based guidelines for planning a successful summer reading program including tips on book selection distribution methods and direction for crucial follow up Most important the authors clearly show how schools and communities can see greater academic gains for students from low income families using the methods described in this book than they can from much more costly interventions

No More Summer-Reading Loss Carrie Cahill, Kathy Horvath, 2013 Everyone loves summer except reading teachers Kids take a vacation from books and those with limited access to books lose ground to their peers You may have thought there s nothing you can do about it but there is No More Summer Reading Loss shows how to ensure that readers continue to grow year round Building independence Keeping kids on grade level Closing the achievement gap These are just a few of the valuable outcomes that No More Summer Reading Loss can support Most importantly it will help you pass on a love of reading that knows no season and gives readers confidence when they return in the fall Publisher s description

Alternatives to Privatizing Public Education and Curriculum Daniel Ness, Stephen J. Farenga, 2017-03-16 Through conversations in honor of Dale D Johnson this book takes a critical view of the monoculture in curriculum and policy that has developed in education with the increase of federal funding and privatization of services for public education and examines the shift from public interest and control to private and corporate shareholder hegemony Most states educational responsibilities assessment of constituents curriculum development and instructional protocols are increasingly being outsourced to private enterprises in an effort to reduce state budgets These enterprises have been given wide access to state resources such as public data from state sanctioned testing results field testing rights to public schools and financial assistance Chapter authors challenge this paradigm as well as the model that has set growing premiums on accountability and performance measures Connecting common impact between the standards movement and the privatization of education this book lays bare the repercussions of high stakes accountability coupled with increasing privatization Winner of The Society of Professors of Education Book Award 2018

The Great Curriculum Debate Tom Loveless, 2004-05-13 Since the early twentieth century American educators have been engaged in a heated debate over what schools should teach and how they should teach it The partisans education progressives and education traditionalists have usually kept their disagreements within the walls of the nation s schools of education Periodically however arguments have erupted which have generated headlines and attracted public attention making clear the potential for bitterness and rancor in education politics In the

1990s progressives and traditionalists squared off in a dispute over reading and mathematics Arguments over how best to teach these two subjects is detailed in *The Great Curriculum Debate How Should We Teach Reading and Math* This book includes contributions from distinguished scholars from both sides of the debate as well as influential nonpartisans The proponents of whole language and phonics present their opposing views on reading Advocates and opponents of NCTM math reform the agenda of the National Council of Teachers of Mathematics NCTM discuss their differing opinions about math Although the authors disagree on many of the most important aspects of learning they agree on one point the school curriculum matters Decisions made now about the content of reading and mathematics will have long term consequences not only for students and schools but for society as a whole Contributors include E D Hirsch Jr University of Virginia Gail Burrill Mathematical Sciences Education Board Michael T Battista Kent State University David C Geary University of Missouri Columbia Roger Shouse Penn State University Adam Gamoran University of Wisconsin Madison Richard Askey University of Wisconsin Madison Diane Ravitch New York University Catherine E Snow Harvard University Margaret Moustafa California State University LA Richard L Allington University of Florida William Lowe Boyd Penn State University a *Readicide* Kelly Gallagher,2009 Reading is dying in our schools Educators are familiar with many of the factors that have contributed to the decline poverty second language issues and the ever expanding choices of electronic entertainment In this provocative new book Kelly Gallagher suggests however that it is time to recognize a new and significant contributor to the death of reading our schools **Library Closures** Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee,2012-11-06 Recent campaigns against the closure of local libraries have highlighted the strong attachment that many people feel to their library services However much of the focus of the campaigns has been on library branches rather than the broader question of the preservation and possible enhancement of the library service Reductions in opening hours and the loss of professional staff may damage the service more than the closure of particular buildings The provision of a library service is a statutory duty but a number of councils have drawn up plans that fail to comply with the requirement to provide a comprehensive and efficient service A full assessment of the needs of the local population for the services is key Guidance on how to assess local needs does exist but more must be done to disseminate it Although the future of public libraries may be uncertain there is opportunity for reassessment of their roles and how they are organised The Committee saw many examples of innovative thinking about what libraries can offer to the local population and a number of models of how those services might be provided Councils which have transferred the running of libraries to community volunteers must continue to provide support otherwise failure may be viewed as closures by stealth The Committee looks forward to the promised report by the end of 2014 on the cumulative effect on library services of the cuts in local authority provision and the promotion of alternatives such as transfers to community volunteers **The Athenaeum** ,1876 **The Leisure Hour** ,1893 **Godey's Lady's Book** ,1856 *Leading Learning for ELL Students* Catherine Beck,Heidi Pace,2017-01-20

Grounded in current research and award winning practice this important book provides a blueprint for school leaders to successfully implement programs and policies for creating an equitable learning environment for English Language Learners ELLs Full of accessible examples strategies checklists and solutions this book covers topics such as elementary and secondary home visitation family literacy programs first generation college attendance family school partnerships second language instruction culturally responsive teaching and professional development The guidance provided in Leading Learning for ELL Students can be put into practice immediately and will help leaders at all levels address the changing landscape of their student populations to ensure the success of all students
