Ang, Shi-Shuenn

Chen, 2009-04-21 An exclusive collection of papers introducing current and frontier technologies of special significance to the planning design construction and maintenance of civil infrastructures This volume is intended for professional and practicing engineers involved with infrastructure systems such as roadways bridges buildings power generating and distribution systems water resources environmental facilities and other civil infrastructure systems Contributions are by internationally renowned and eminent experts and cover 1 Life cycle cost and performance 2 Reliability engineering 3 Risk assessment and management 4 Optimization methods and optimal design 5 Role of maintenance inspection and repair 6 Structural and system health monitoring 7 Durability fatigue and fracture 8 Corrosion technology for metal and R C structures 9 Concrete materials and concrete structures *The Moving Frontier* Lois Labrianidis, 2019-06-04 Originally published in 1992 and based on two theoretical approaches the Global Commodity Chain and the Global Production Network this book investigates the multitude of processes as well as diverse consequences of global integration upon industries regions enterprises and employees In doing so it draws from the experience of Western and Eastern and South eastern Europe These European cases are complemented with evidence from Kenya Thailand as well as US China India and Mexico The book explores multiple causes of decentralization arguing beyond the pursuit of cheap and adaptable labour It goes on to argue that the effects of delocalization within Europe unlike those in the rest of the developed world are less negative than usually portrayed It concludes by putting forward recommendations for best future practice of successful adjustment strategies and examines

how these might be adopted elsewhere in the world

Airport Passenger Terminal Planning and Design Landrum & Brown, 2010 TRB's Airport Cooperative Research Program ACRP Report 25 Airport Passenger Terminal Planning and Design comprises a guidebook, spreadsheet models and a user's guide in two volumes and a CD ROM intended to provide guidance in planning and developing airport passenger terminals and to assist users in analyzing common issues related to airport terminal planning and design. Volume 1 of ACRP Report 25 explores the passenger terminal planning process and provides in a single reference document the important criteria and requirements needed to help address emerging trends and develop potential solutions for airport passenger terminals. Volume 1 addresses the airside terminal building and landside components of the terminal complex. Volume 2 of ACRP Report 25 consists of a CD ROM containing 11 spreadsheet models which include practical learning exercises and several airport specific sample data sets to assist users in determining appropriate model inputs for their situations and a user's guide to assist the user in the correct use of each model. The models on the CD ROM include such aspects of terminal planning as design hour determination, gate demand, check in and passenger and baggage screening which require complex analyses to support planning decisions. The CD ROM is also available for download from TRB's website as an ISO image.

Innovative State Aneesh Chopra, 2014-05-06 As the first Chief Technology Officer, Aneesh Chopra did groundbreaking work to bring our government into the 21st century. President Barack Obama. Over the last twenty years, our economy and our society from how we shop and pay our bills to how we communicate have been completely revolutionized by technology. As Aneesh Chopra shows in Innovative State, once it became clear how much this would change America, a movement arose around the idea that these same technologies could reshape and improve government. But the idea languished and while the private sector innovated, our government stalled, trapped in a model designed for the America of the 1930s and 1960s. The election of Barack Obama offered a new opportunity. In 2009, Aneesh Chopra was named the first Chief Technology Officer of the United States federal government. Previously the Secretary of Technology for Virginia and managing director for a health care think tank, Chopra was tasked with leading the administration's initiatives for a more open, tech-savvy government. In Innovative State, Chopra offers an absorbing look at how open government can establish a new paradigm for the Internet era and allow us to tackle our most challenging problems from economic development to affordable health care. With inspiring stories and clear insights, Chopra provides a playbook for open innovations that work both in the public and the private sector. Walter Isaacson, 1 New York Times bestselling author of *Steve Jobs*.

Reforming the Posts Charles Kenny, The monopoly supported universal service obligation (USO) is usually defended on the grounds that the monopoly allows for cross subsidy in letter services that in turn allows universal access to a service of great importance to all. The author argues that letter delivery as opposed to other services that may be provided by post offices is not in universal demand in poor countries; that the size of the market in developing countries is such that USOs could not be met under the monopoly model; and that the monopoly carries heavy costs for sector

development and consumer welfare He proposes in the place of the postal USO a competitive approach involving universal access to a range of services that poor people have a need to access Regarding reform of the incumbent the author takes a preliminary first cut at examining the statistical relationship between postal performance as measured by letters per capita allowing for income per capita trust in the postal service and postal efficiency and finds a significant link between the three The results suggest that reforms that improve postal efficiency and trust in the postal network will improve the performance of the postal network The author suggests that there may be better uses of cross subsidy from within the sector and government subsidy from without than supporting the inefficient delivery of a service rarely used by poor people World Bank web site
