Domestic Animals and Leisure Neil Carr,2016-04-29 This volume offers both an insight into the current state of research on domestic animals in leisure and a lens through which to begin to chart the future of research in this field All of the contributions to the

collection are underpinned by ongoing debates about human animal relationships and the rights and welfare of the latter

Nature Wars Jim Sterba, 2012-11-13 This may be hard to believe but it is very likely that more people live in closer proximity to more wild animals birds and trees in the eastern United States today than anywhere on the planet at any time in history For nature lovers this should be wonderful news unless perhaps you are one of more than 4 000 drivers who will hit a deer today your child's soccer field is carpeted with goose droppings coyotes are killing your pets the neighbor's cat has turned your bird feeder into a fast food outlet wild turkeys have eaten your newly planted seed corn beavers have flooded your driveway or bears are looting your garbage cans For 400 years explorers traders and settlers plundered North American wildlife and forests in an escalating rampage that culminated in the late 19th century's era of extermination By 1900 populations of many wild animals and birds had been reduced to isolated remnants or threatened with extinction and worry mounted that we were running out of trees Then in the 20th century an incredible turnaround took place Conservationists outlawed commercial hunting created wildlife sanctuaries transplanted isolated species to restored habitats and imposed regulations on hunters and trappers Over decades they slowly nursed many wild populations back to health But after the Second World War something happened that conservationists hadn't foreseen sprawl People moved first into suburbs on urban edges and then kept moving out across a landscape once occupied by family farms By 2000 a majority of Americans lived in neither cities nor country but in that vast in between Much of sprawl has plenty of trees and its human residents offer up more and better amenities than many wild creatures can find in the wild plenty of food water hiding places and protection from predators with guns The result is a mix of people and wildlife that should be an animal lover's dream come true but often turns into a sprawl dweller's nightmare *Nature Wars* offers an eye opening look at how Americans lost touch with the natural landscape spending 90 percent of their time indoors where nature arrives via television films and digital screens in which wild creatures often behave like people or cuddly pets All the while our well meaning efforts to protect animals allowed wild populations to burgeon out of control causing damage costing billions degrading ecosystems and touching off disputes that polarized communities setting neighbor against neighbor Deeply researched eloquently written counterintuitive and often humorous *Nature Wars* will be the definitive book on how we created this unintended mess

Pet Politics Susan Hunter, Richard A. Brisbin, 2016-02-15 Although scholars in the disciplines of law psychology philosophy and sociology have published a considerable number of prescriptive normative and theoretical studies of animals in society *Pet Politics* presents the first study of the development of companion animal or pet law and policy in Canada and the United States by political scientists The authors examine how people and governments classify three species of pets or companion animals cats dogs and horses for various degrees of legal protection They then detail how interest groups shape the agenda for companion animal legislation and regulation and the legislative and administrative formulation of anticruelty kennel licensing horse slaughter feral and roaming cat and breed ban policies Finally they examine the enforcement of these

laws and policies by agencies and the courts Using an eclectic mix of original empirical data original case studies and interviews and relying on general theories and research about the policy process and the sociopolitical function of legality the authors illustrate that pet policy is a unique field of political struggle a conflict that originates from differing perspectives about whether pets are property or autonomous beings and clashing norms about the care of animals The result of the political struggle the authors argue is difficulty in the enactment of policies and especially in the implementation and enforcement of laws that might improve the welfare of companion animals

Bad Dog Harlan Weaver, 2021-03-26

Challenges the way we think about pit bulls and their human companions Fifty plus years of media fearmongering coupled with targeted breed bans have produced what could be called America's Most Wanted dog the pit bull However at the turn of the twenty first century competing narratives began to change the meaning of pit bull Increasingly represented as loving members of mostly white middle class heteronormative families pit bulls and pit bull type dogs are now frequently seen as victims rather than perpetrators beings deserving not fear or scorn but rather care and compassion Drawing from the increasingly contentious world of human dog politics and featuring rich ethnographic research among dogs and their advocates **Bad Dog** explores how relationships between humans and animals not only reflect but actively shape experiences of race gender ethnicity sexuality nation breed and species Harlan Weaver proposes a critical and queer reading of pit bull politics and animal advocacy challenging the zero sum logic through which care for animals is seen as detracting from care for humans Introducing understandings rooted in examinations of what it means for humans to touch feel sense and think with and through relationships with nonhuman animals Weaver suggests powerful ways to seek justice for marginalized humans and animals together

Healing Hearts Fiona J. Diggins, 2012-02-14

True stories of animals trapped in heartbreaking situations of neglect and abuse and the people who rescued them **Healing Hearts** highlights the compassionate side of people the loving loyal and forgiving nature of animals and exemplifies the powerful and unbreakable bonds that can form between species

Eventually, you will no question discover a supplementary experience and achievement by spending more cash. nevertheless when? do you say you will that you require to get those all needs in the same way as having significantly cash?
