A Clinician's Guide to Stuttering Sol Adler,1966

Approaches to the

Treatment of Stuttering Peggy Dalton,2018-10-26 In the years prior to publication cures for stuttering seemed to appear constantly but many were of limited value were poorly evaluated and gave only a temporary alleviation that was not transferred to daily life More responsible clinicians produced publications expounding one particular approach to therapy but less was available giving a balanced overview which was of practical help to therapists Originally published in 1983 this book aimed to provide such an overview with a focus on practical intervention rather than on theory The need for careful

assessment is particularly stressed and also the need for flexibility in the choice of treatment for any one client. Changes in fluency are looked at in relation to the effects they might have on the person's life as a whole and factors involved in the maintenance of this change are discussed. In addition, adjuncts to speech therapy such as drugs, hypnosis and various forms of masking are evaluated. Issues of the training of therapists are raised and suggestions made as to the nature of the therapeutic relationship when working with people who stutter.

Evidence-Based Treatment of Stuttering Anne K.

Bothe, 2004-07-19 This book is the result of a State of the Art Conference held at the University of Georgia dedicated to the evidence based treatment of stuttering. An international group of prominent fluency researchers and clinicians were invited to present and discuss current data and issues related to the treatment of stuttering. The topic was defined to include evidence about stuttering, evidence about stuttering treatment and discussions of how that evidence should guide the continuing research and practice. The explicit link between empirical evidence and suggestions for clinical practice is the goal of the book. The book begins by addressing the notion of evidence based practice and considers its implications for stuttering treatment. Part II presents the intersection of the nature of stuttering, the theories of stuttering and the implications of nature theory and other knowledge for stuttering treatment decisions. Part III provides two of the many measurement issues facing stuttering treatment followed by Part IV which is devoted to the quality of treatment research, evidence for specific treatments and in terms of some more general methodological and professional issues. The final part summarizes the clinical recommendations made throughout the book and discusses evidence based outcomes focused clinical decisions for stuttering. These chapters are intended to provide state of the art information to researchers, clinicians and students who are interested in developing, identifying or using the best possible evidence based treatments for stuttering.
