Question Answer Supporting Student Generated Elementary:

The Question is the Answer Molly Ness, 2015-12-08 The Question is the Answer is a teacher's guide to helping young readers generate text-based questions. The purpose of this book is to help teachers and parents value and promote student-generated questions to facilitate motivation, engagement, and cognitive development. Teaching Science in Elementary and Middle School Joseph S. Krajcik, Charlene M. Czerniak, 2014-01-23 Teaching Science in Elementary and Middle School offers in-depth information about the fundamental features of project-based science and strategies for implementing the approach. In project-based science classrooms, students investigate, use technology, develop artifacts, collaborate, and make products to show what they have learned. Paralleling what scientists do, project-based science represents the essence of inquiry and the nature of science. Because project-based science is a method aligned with what is known about how to help all children learn science, it not only helps students learn science more thoroughly and deeply; it also helps them experience the joy of doing science. Project-based science embodies the principles in A Framework for K-12 Science Education and the Next Generation Science Standards. Blending principles of learning and motivation with practical teaching ideas, this text shows how project-based learning is related to ideas in the Framework and provides concrete strategies for meeting its goals. Features include long-term interdisciplinary, student-centered lessons, scenarios, learning activities, and Connecting to Framework for K-12 Science Education textboxes. More concise than previous editions, the Fourth Edition offers a wealth of supplementary material on a new Companion Website, including many videos showing a teacher and class in a project environment.

Every Minute Matters [Grades K-5] Molly Ness, 2020-07-02 Make the most of every instructional minute with engaging literacy activities. Time, or lack thereof, may be the most precious commodity in the classroom. From covering all the necessary curriculum and imparting life skills to attending meetings and answering emails, educators are faced with real challenges when there never seems to be enough time to do it all. Although teachers don't have the power to create more minutes in the school day, they do have the power to be effective and efficient with the time given. Molly Ness asks teachers first to examine their use of time in the classroom in order to make more space for literacy. She then introduces 40 innovative activities designed to replace seatwork. These literacy-rich alternatives for classroom transitions are presented alongside Research on instructional time in K-5 classrooms. Strategies for how to maximize every minute of instruction. Suggestions for improving efficiency to expand independent reading and writing time. Reflective practices to help teachers examine how they use the time they have. The instructional day is ripe for redesign with a thoughtful and authentic time audit. Every Minute Matters guides educators through that process by outlining literacy-rich activities to optimize transitional times and minimize lost instructional minutes. *Creativity in the Classroom* Alane Jordan Starko, 2017-08-16 Creativity in the Classroom, sixth edition, helps teachers link creativity research and theory to the everyday activities of classroom teaching. This foundational textbook is relevant for any course dealing wholly or partially with creativity and teaching. The sixth edition has been revised.
