Nightfighter Mark A. Magruder, 2012-01-24 A biography of the leader of the top scoring Nightfighter Squadron who risked their lives flying through darkness in the Pacific Theatre of World War II During World War II the job of a nightfighter was akin to a deadly game of hide and seek in a pitch black sky Each pilot's life literally depended on his radio link to support personnel on the ground Electrical failures could be catastrophic and engine trouble usually proved fatal Unlike other fighter pilots these men had zero visual perspective Alone in a cockpit it was easy for their minds to play tricks on them but for nightfighters a few moments of vertigo were a death sentence No one knew this better than then ranked Lt Col Marion Milton Black Mac Magruder His highly classified training program required each of his scrappers to identify every part of the cockpit environment by sound smell and touch Strict innovative and intense this no nonsense marine would lead his men to the Okinawa Campaign in an emergency deployment after a year in combat in the longest over water flight of single engined fighters in the Pacific Theatre just to get into the fight During their time on Okinawa and Engebi VMF N 533 also known as Black Mac's Killers experienced the worst typhoon season the island had seen in several hundred years They also would become the target of the Giretsu when the ruthless Japanese suicide warriors attacked Yontan Air Field the only attack of its kind during the war And even though the squadron arrived one month after battle commenced the 533 held the record for all radar intercept kills Black Mac's Killers set many records and earned many distinctions during the war including the Presidential Unit Citation This biography follows Magruder through his military career highlighting his accomplishments as leader of the top scoring Nightfighter Squadron in the Pacific Theatre

Infrared Systems for Tactical Aviation George B. Hept,2002 Evolutionary development is based on using continuous experimentation and adaptation in changing circumstances to reward success while allowing but eventually eliminating failure Since this approach is agile flexible quick reacting and thrives on change it contrasts with strategic planning in which systems are developed in a planned and orderly fashion to meet future requirements A planned system is rigid slow to react and resists or ignores change which contrasts with how the military traditionally develops weapon systems One word that distinguishes between evolutionary and planned development is chaos Chaos like risk is unavoidable and hence should be managed rather than avoided Indeed a certain degree of chaos is

desirable because it generates the necessary set of adaptations and ideas that can eventually be selected for evolutionary improvement The Darwinian concept of survival of the fittest can be applied to ideas systems and organizations that seek to maintain a competitive advantage
