Nikon Flash Manuals:

Magic Lantern Guides®: Nikon D40 Simon Stafford, 2009-06-02 Nikon's success in the D SLR market has been outstanding and the new D40 is sure to be yet another sales sensation. Written by Simon Stafford, this Magic Lantern manual gives owners all the information they need to understand and operate their camera. It explains every feature and function, plus the in-camera processing and file formats, menus, and the LCD monitor operation modes, flash, lenses, working with the computer, and much more. It's a must-have to make the most out of this great piece of equipment. **On-Camera Flash**

, 2015-10-19 Photographers are always looking for perfect light. Unfortunately, the quality of available light and the situations in which photos are created are rarely perfect. This is especially true when photographing weddings or portraits on location. So while finding beautiful existing light is every photographer's ideal, it isn't always possible. This is the point at which photographers tend to reach for a portable on-camera flash. Indeed, these intense light sources can prove invaluable, but only if you know how to use them effectively. In the hands of an inexperienced photographer, on-camera flash will produce images that look flat and lifeless, images with harsh shadows, washed-out skin tones, cavernous black backgrounds, and other unappealing visual characteristics. In this book, acclaimed wedding and portrait photographer Neil van Niekerk shows you how to avoid the pitfalls photographers new to speedlights often encounter so that you can produce professional images using on-camera flash. You'll learn to use simple accessories to manipulate the quality of light from your flash and how to improve a lighting scenario by enhancing rather than overwhelming the existing light. When the available light is too low and too uneven to be combined with flash, he shows you how to override it completely with flash and, with some thought and careful application of specialized techniques, still get results that look great. On-camera flash is one of the most challenging light sources to master, but with the techniques in this book, you'll learn to use it with confidence. For wedding and environmental portrait photographers who must work in ever-changing lighting scenarios, this can mean better images and better sales.

Magic Lantern Guides®: Nikon D300 Simon Stafford, 2009-06-02 Simon Stafford, the Technical Editor to the Nikon Owners Club International's Nikon Owner magazine, tells all about the company's new semi-pro camera, the D300. He explains how to make the most of the model's up-to-the-minute attributes, including the 12.3 effective megapixel Nikon DX format CMOS image sensor with integrated A/D converter and the increased bit precision of selectable 14-bit NEF RAW output.

Magic Lantern Guides®: Nikon D60 Simon Stafford, 2009-06-02 Photographers will be happy to see this successor to Nikon's user-friendly D40x. Small and light, it's perfect for those moving up from compact digital cameras. And it's better than ever, with its enhanced Retouch menu options, new EXPEED digital image processing for refined tone and color, lightning-like start-up time, and Active D Lighting that improves image quality in high-contrast conditions. Magic Lantern DVD Guide provides a perfect introduction to the model, while the book written by Nikon expert Simon Stafford will take them even more deeply into the camera's every function.
