Moriarty,2015-02-12 This innovative work provides a state of the art overview of current thinking about the development of brand strategy Unlike other books on branding it approaches successful brand strategy from both the producer and consumer perspectives The Science and Art of Branding makes clear distinctions among the producer s intentions external brand realities and consumer s brand perceptions and explains how to fit them all together to build successful brands Co author Sandra Moriarty is also the author of the leading Principles of Advertising textbook and she and Giep Franzen have filled this volume with practical learning tools for scholars and students of marketing and marketing communications as well as actual brand managers The book explains theoretical concepts and illustrates them with real life examples that include case studies and findings from large scale market research Every chapter opens with a mini case history and boxed inserts featuring quotes from experts appear throughout the book The Science and Art of Branding also goes much more deeply than other works into the core concept of brand equity employing new measurement systems only developed over the last few years **Geschiedenis van Noviomagus Nijmegen** Guus Pikkemaat,1988 **Chosen Legacies** Linde

Egberts,2017-07-14 The urge for regional identity has not declined in the process of globalization Rather heritage is used to develop regional distinctiveness and to charge identities with a past Particularly helpful for this aim are creation stories Golden Ages or recent shared traumas Some themes such as the Roman era or the Second World War appear easier to appropriate than for example prehistory This book assesses the role of heritage in the construction of regional identities in Western Europe It contains case studies on early medieval heritage in Alsace and Euregio Meuse Rhine industrial heritage in the German Ruhr area and competing memories in the Arnhem Nijmegen region in the Netherlands It presents new insights into the process of heritage production on a regional level in relationship to processes of identity construction The theoretical analysis of heritage and regional identity is innovative as these concepts were hardly analysed in relation to each other before This book also offers insights into policy tourism spatial development and regional development to policymakers politicians designers and professionals in the heritage and tourism industries **Haven in de branding** Reginald

Loyen,2008 De haven van Antwerpen telt vandaag de dag 65 000 voltijdse banen en genereert bijna 3% van het bruto binnenlands product Over de manier waarop dit economische complex tot stand kwam is maar weinig bekend behalve dat er sinds 150 jaar een bijna explosieve groei moet hebben plaatsgevonden Haven in de branding analyseert voor het eerst het tijdspad de oorzaken en gevolgen van deze groei op basis van de goederen stromen en de toegevoegde waardecreatie Zo wordt de waarde van de Antwerpse staaltrafiek verduidelijkt net als de impact van de tonnage balans de mythe van de spoorweghaven Antwerpen en het Belgische karakter van de overslag Ook de groei bij inter nationale concurrenten Rotterdam en Hamburg komt aan bod Centraal staat de vraag hoe de haven van Antwerpen goederen stromen kon

aantrekken Was de haven gelijk een rots in de branding overgeleverd aan de grillen van de stroming of hadden havenarbeiders en havenbestuurders invloed op de richting en de sterkte van de stroom *City Branding* K.

brands trademarks that identify a product and differentiate it from its competitors From the early modern period onwards literary authors and their texts are constantly branded and have been both the object and the trailblazer of a complex marketing process The authors of this volume analyze this branding process throughout the centuries focusing on the Netherlands To what extent is our experience of Dutch literature prefigured by brands and what role does branding play when introducing European authors in the Dutch literary field or vice versa By answering these questions Branding Books Across the Ages seeks to show how literary scholars understand branding a phenomenon that has long been intertwined with literature
