The EBay Price Guide Julia L. Wilkinson, 2006 Provides lists of selling prices of items found on eBay in such categories as antiques boats books cameras coins collectibles dolls DVDs real estate stamps tickets and video games Notes From A Small Room Ruskin Bond, 2017-08-29 It's the simple things in life that keep us from going crazy Ruskin Bond writes in this enchanting collection of essays a celebration of the uncomplicated pleasures of a life well lived In A Good Philosophy we learn of Bond's life philosophy or the lack of it and In Search of the Perfect Window we join him in meditating on the qualities of a good window and its importance to a room Whether contemplating the sound of a tropical downpour on the fragrance of lime trees in the Himalayas or on a year spent with his cat Suzie Ruskin Bond transports us to a quieter more elegant world where time moves at a gentle pace He invites us to revel in the intricacies of life and to poke fun at its absurdities with insight wisdom and wit Common Scents Jonas Rosenbrück, 2024-10-01 The sense of smell has long been the most neglected of the human senses in literature Common Scents sets out to undo this forgetting of olfactory sense making by tracing the appearance of odors in modern German and French poetry Jonas Rosenbrück argues that smell's persistence undermines modernity's self image as an ocular age and shows how scents index a veritable revolution of the senses Such a revolution as a redistribution of the senses would make the common and shared character of our existence in scented atmospheres perceptible Bringing contemporary ecocritical interest in atmospheres air and the senses into dialogue with literary criticism theories of modernity and political philosophy Common Scents provides novel interpretations of figures such as Friedrich Hölderlin Charles Baudelaire Friedrich Nietzsche and Bertolt Brecht These readings demonstrate how all terrestrial life is interlinked in the aerial commons that escapes the privatizing grasp of what Karl Marx called the sense of having Reformulating Bruno Latour Rosenbrück argues that we have never been deodorized In attending to this fact Common Scents reconfigures subjectivity corporeality and politics **Marketing** Michael R. Solomon, Greg W. Marshall, Elnora W. Stuart, 2006 This reader friendly marketing book conveys timely and relevant material in a dynamic presentation of how marketing concepts are implemented and what they mean in the marketplace It introduces marketing from the perspective of real people making real marketing decisions at leading companies every day Learners will come to understand that marketing is about creating value for customers for companies and for society as a whole and they will see how that is accomplished in the real world A five part organization covers making marketing value decisions identifying markets and understanding customers needs for value creating the value proposition communicating the value proposition and delivering the value proposition For individuals interested in a career in marketing **Art Scents** Larry Shiner, 2020-02-11 Although the arts of incense and perfume making are among the oldest of human cultural practices it is only in the last two decades that the use of odors in the creation of art has begun to attract attention under the rubrics of olfactory art or scent art Contemporary olfactory art ranges from gallery and museum installations and the use of scents in music film and drama to the ambient

scenting of stores and the use of scents in cuisine All these practices raise aesthetic and ethical issues but there is a long standing philosophical tradition most notably articulated in the work of Kant and Hegel which argues that the sense of smell lacks the cognitive capacity to be a vehicle for either serious art or reflective aesthetic experience This neglect and denigration of the aesthetic potential of smell was further reinforced by Darwin s and Freud s views of the human sense of smell as a near useless evolutionary vestige Smell has thus been widely neglected within the philosophy of art Larry Shiner s wide ranging book counters this tendency aiming to reinvigorate an interest in smell as an aesthetic experience He begins by countering the classic arguments against the aesthetic potential of smell with both philosophical arguments and evidence from neuroscience psychology anthropology history linguistics and literature He then draws on this empirical evidence to explore the range of aesthetic issues that arise in each of the major areas of the olfactory arts whether those issues arise from the use of scents with theater and music sculpture and installation architecture and urban design or avant garde cuisine Shiner gives special attention to the art status of perfumes and to the ethical issues that arise from scenting the body the ambient scenting of buildings and the use of scents in fast food Shiner s book provides both philosophers and other academic readers with not only a comprehensive overview of the aesthetic issues raised by the emergence of the olfactory arts but also shows the way forward for further studies of the aesthetics of smell
