Welcome aboard a genre bending ride that combines an ambitious exploration of the science of the senses with a deep dive into the comic book and live action pursuits of the Marvel superhero Daredevil. What could possibly allow someone to hear heartbeats? Is there something it is like to radar sense? Is it true that your remaining senses are enhanced if you lose one of them? And how is it that any of us can sense anything in the first place? Christine Hanefalk takes an in depth look at these questions and many more in this definitive examination of the science of Daredevil's senses. Convinced that Matt Murdock makes for the best thought experiment in comics, the author makes a passionate case for how we might come to understand this fan favorite character on a deeper level, making room for both his blindness and heightened senses. If you are both a Daredevil fan and someone who enjoys the science non fiction genre, this book is sure to satisfy on both counts.
