The language of physics is universal and the book is suited to students globally. However, the book recognises and addresses the specific needs of students in African Universities. There is a marked heterogeneity in the background of students ranging from those who are well prepared to those who are not so well prepared. The book meets the needs of all students. It presents detailed explanations of difficult to grasp topics with the help of simple but clearly drawn and labeled diagrams. The discussions and conclusions are presented point wise and key words, definitions, laws etc are highlighted. A unique feature of the book is a number of Recipes which give students tailor made guidance to problems solving. Application of the recipe is illustrated by a solved example followed by a similar exercise for students to practice. There are a large number of problems and exercises at the end of each chapter to further sharpen their skills.
