Durden, 2009-04-22 Medical and Veterinary Entomology Second Edition has been fully updated and revised to provide the latest information on developments in entomology relating to public health and veterinary importance Each chapter is structured with the student in mind organized by the major headings of Taxonomy Morphology Life History Behavior and Ecology Public Health and Veterinary Importance and Prevention and Control This second edition includes separate chapters devoted to each of the taxonomic groups of insects and arachnids of medical or veterinary concern including spiders scorpions mites and ticks Internationally recognized editors Mullen and Durden include extensive coverage of both medical and veterinary entomological importance This book is designed for teaching and research faculty in medical and veterinary schools that provide a course in vector borne diseases and medical entomology parasitologists entomologists and government scientists responsible for oversight and monitoring of insect vector borne diseases and medical and veterinary school libraries and libraries at institutions with strong programs in entomology Follows in the tradition of Herm s Medical and Veterinary Entomology The latest information on developments in entomology relating to public health and veterinary importance Two separate indexes for enhanced searchability Taxonomic and Subject New to this edition Three new chapters Morphological Adaptations of Parasitic Arthropods Forensic Entomology Molecular Tools in Medical and Veterinary Entomology 1700 word glossary Appendix of Arthropod Related Viruses of Medical Veterinary Importance Numerous new full color images illustrations and maps throughout **Drug Information** Bonnie Snow, 2008 This is the long awaited third edition of the most comprehensive compilation of drug information resources available A co publication with the Medical Library Association it draws on industry expert Bonnie Snow s 30 years of experience with pharmaceutical information needs and applications Snow reviews 400 print and electronic resources More than a bibliography this readable guide brings together the best resources plus practical advice on everything from expert search techniques to core collections for libraries Subject areas covered include pharmaceutical technology legal and regulatory issues world wide industrial pharmacy market research product guides and prescribing information in the global marketplace drug interactions drug effects on pregnancy lactation and reproduction pharmacovigilance and much much more Completely revised reorganized and updated the third edition focuses on information sources not covered elsewhere Absolutely unique in its value as both a desk reference and a text for classroom use or self study this edition manages to meet the needs of students information professionals health care providers and pharmacy practitioners **Mammalogy** Terry A. Vaughan, James M. Ryan, Nicholas J. Czaplewski, 2013-12-11 Mammalogy is the study of mammals from the diverse biological viewpoints of structure function evolutionary history behavior ecology classification and economics Thoroughly updated the Sixth Edition of Mammalogy explains and clarifies the subject as a unified whole The text begins by defining mammals and summarizing their origins It moves on to discuss the orders and families of mammals with comprehensive coverage on the fossil history current distribution morphological characteristics

and basic behavior and ecology of each family of mammals The third part of the text progresses to discuss special topics such as mammalian echolocation physiology behavior ecology and zoogeography The text concludes with two additional chapters previously available online that cover mammalian domestication and mammalian disease and zoonoses

The Hand that Feeds Alexander Mullan,Riley Smallman,Herre de Bondt ,Juliette Waterman,2025-05-13 Food plays a major part in shaping human animal relations from nurturing farm and zoo animals to bringing wild birds into suburban gardens Food mediated interactions create personal interspecies bonds enrich and alter environments change species distributions enable new relationships and reconfigure social perspectives but also lead to many concerns over health and disease for example as well as conflicts over spaces and resources However previous attention has almost exclusively focused on the purpose driven utilitarian and economic aspects of feeding rather than the affective and emotional encounters that motivate many feeding practices Presenting new research and interdisciplinary case studies The Hand that Feeds considers animal feeding from historic to modern times The volume explores the nuances and complexity of non utilitarian feeding relationships across urban and rural divides in the wild on the farm at the zoo and in the garden and how our feeding relationships have altered animal distributions and behaviours The authors scrutinise contrasts between which species are promoted and which are persecuted and how the species we choose to feed reflects broader world views and cultural values Ultimately this volume engages in the discussion of how we feed why we feed which animals we deem worthy of feeding and the widespread impacts of feeding relations Praise for The Hand that Feeds An innovative and exciting collection of studies exploring the cultural phenomenon of animal feeding Drawing on cutting edge approaches and case studies from wild raptors to livestock and zoo animals The Hand that Feeds has started a new conversation on this fundamental relationship between other species and ourselves Aleks Pluskowski University of Reading This fascinating book explores the how why and consequences of people feeding other species drawing on perspectives from the historical life and social sciences Different voices bring diverse observations and viewpoints to a refreshingly lively and informative discussion of a topic that is anything but simple Terry O Connor University of York This is a fantastic interdisciplinary collection interrogating how human animal relations are mediated by food Food can be an enticement a medicine or a poison it can be a vehicle for protection and bonding or distance and killing Dolly J rgensen University of Stavanger

Health and Disease in Free-Ranging and Captive Wildlife Robert James Ossiboff,Nicole Indra Stacy,Francesco Carlo Origgi,2021-02-24
