Natural Disasters David E. Newton, 2019-06-14 This book provides a detailed introduction to natural disasters and the ways in which they have had and continue to have profound effects on human society Natural Disasters A Reference Handbook surveys the impact of these events on human civilization The opening chapter provides a general history and background of the major types of natural disasters including earthquakes volcanic eruptions severe storms and forest fires The information presented in this introduction allows the reader to better understand current issues problems and solutions related to natural disasters discussed in subsequent chapters The book covers the role of natural disasters in human life from earliest recorded history

and to some extent even earlier to the present day It provides an extensive variety of resources that encourage readers to learn more about the topics discussed The book is intended for readers in the late middle school to high school age range as well as adults who may have a special interest in the subject **Natural Areas Journal** ,2008 **Emulating Natural Forest Landscape Disturbances** Ajith H. Perera,Lisa J. Buse,Michael G. Weber,2008-01-11 What is a natural forest disturbance How well do we understand natural forest disturbances and how might we emulate them in forest management What role does emulation play in forest management Representing a range of geographic perspectives from across Canada and the United States this book looks at the escalating public debate on the viability of natural disturbance emulation for sustaining forest landscapes from the perspective of policymakers forestry professionals academics and conservationists This book provides a scientific foundation for justifying the use of and a solid framework for examining the ambiguities inherent in emulating natural forest landscape disturbance It acknowledges the divergent expectations that practitioners face and offers a balanced view of the promises and challenges associated with applying this emerging forest management paradigm The first section examines foundational concepts addressing questions of what emulation involves and what ecological reasoning substantiates it These include a broad overview a detailed review of emerging forest management paradigms and their global context and an examination of the ecological premise for emulating natural disturbance This section also explores the current understanding of natural disturbance regimes including the two most prevalent in North America fire and insects The second section uses case studies from a wide geographical range to address the characterization of natural disturbances and the development of applied templates for their emulation through forest management The emphasis on fire regimes in this section reflects the greater focus that has traditionally been placed on understanding and managing fire compared with other forms of disturbance and utilizes several viewpoints to address the lessons learned from historical disturbance patterns Reflecting on current thinking in the field immediate challenges and potential directions the final section moves deeper into the issues of practical applications by exploring the expectations for and feasibility of emulating natural disturbance through forest management **Cultural Heritage and Natural Disasters** Ionut Cristi Nicu,Alin Mihu-Pintilie,Erich Nau,2021-09-01 This book brings together a total of six papers in an interdisciplinary way at the border of natural disasters and cultural heritage There is a need for studying and documenting cultural heritage in Arctic landscapes as these are the most affected by climate change Remote sensing represents a powerful tool in the monitoring management and safeguarding of cultural heritage Sites included in the UNESCO World Heritage List should receive more attention from both geoscientists and social scientists Urbanization has a short and long lasting effect on the conservation of cultural heritage **THE CONSEQUENCES OF DISASTERS** Helen James,Douglas Paton,2015-12-22 The Consequences of Disasters Demographic Planning and Policy Implications presents innovative multi disciplinary perspectives on how people and societies respond to and recover from sudden unexpected crisis events like natural disasters which impact tragically on the established patterns

and structures of their lives Through detailed empirical analysis which employs both qualitative and quantitative research methodologies the twenty two chapters in this fine volume explore these critical issues Chapters have a wide global range across both democratic and transforming governance systems which spotlight the many different ways in which different political jurisdictions respond to the demographic planning and policy implications of the natural disasters affecting their citizens The authors collectively provide insights into varying socio cultural and political disaster frameworks from China Japan the USA New Zealand Myanmar Indonesia Taiwan Iran The Philippines and Pakistan Taking the conceptual and analytical lens of social capital family formation and migration patterns the authors employ comparative demographic anthropological and sociological approaches to present the human security contexts of natural disasters when they unexpectedly wreak havoc on human societies and the coping and response behaviors they adopt develop and use as survivors as they set about re building their lives over periods that can extend over several years This book provides many innovative insights which will be of value to disaster policy experts practitioners in the humanitarian field civil society and government sectors and researchers engaged in disaster recovery and reconstruction practice and research

Palynology and Vegetation History Valentí Rull, Encarni Montoya, Thomas Giesecke, Jesse L. Morris, 2019-01-11 This Research Topic commemorates the centenary of the first quantitative pollen diagram by Lennart von Post the founder of paleoecological palynology The main aim is to provide a thorough view of the use of palynology in aspects such as the reconstruction of Quaternary vegetation and environmental changes the role of natural and anthropogenic drivers in the development of the Quaternary vegetation the shaping of present day ecological and biogeographical patterns the potential application of this knowledge in biodiversity conservation and landscape restoration and the development of new methods of pollen analysis and data management The Research Topic is subdivided into four main conceptual parts namely 1 modern analog studies 2 land cover estimates from pollen data 3 vegetation dynamics reconstructions from Europe North and South America Africa and Oceania and 4 large scale reviews and meta analyses Hopefully this Research Topic will serve to appraise the state of the art of modern palynology and highlight the usefulness of this discipline in long term ecological research
