**Land Grabbing and Global Governance** Matias E. Margulis, Nora McKeon, Saturnino Borrás Jr., 2016-05-23 Land grabbing per se is not a new phenomenon given its historical precedents in the eras of imperialism However the character scale pace orientation and key drivers of the recent wave of land grabs is a distinct historical event closely tied to the changing dynamics of the global agri food feed and fuel complex Land grabbing is facilitated by ever greater flows of capital goods and ideas across borders and these flows occur through axes of power that are far more polycentric than the North South imperialist tradition Land grabs occur in the context of changes in the character of the global food regime formerly anchored by North Atlantic empires the integrated food energy complex seems to be headed towards multiple centres of power especially with the rise of the BRICS and the proliferation of middle income countries participating in many of the land transactions Land Grabbing and Global Governance offers insights from leading scholars and experts on contemporary land grabs This volume examines land grabs in direct relation to a global economy undergoing profound change and the role of new configurations of actors and power in governance institutions and practices This book was published as a special issue of Globalizations

**Land** Derek Hall, 2013-04-03 Land is one of the world's most emotionally resonant resources and control over it is fundamental to almost all human activity From the local level to the global we are often in conflict over the ground beneath our feet But because human relationships to land are so complex it can be difficult to think them through in a unified way This path breaking book aims to change that by combining insights from multiple disciplines to develop a framework for understanding the geopolitics of land today Struggles over land argues Derek Hall relate to three basic principles its role as territory its status as property and the ways in which its use is regulated This timely introduction explores key dimensions of these themes including inter state wars over territory the efforts of non governmental organizations to protect property rights and environments in the global South and the land grabs attempted by contemporary corporations and governments Drawing on a wide range of cases and examples from the Afghanistan Pakistan

Land and Loyalty Tomas Larsson, 2012-06-01 Domestic and international development strategies often focus on private ownership as a crucial anchor for long term investment the security of property rights provides a foundation for capitalist expansion In recent years Thailand's policies have been hailed as a prime example of how granting formal land rights to poor farmers in low income countries can result in economic benefits But the country provides a puzzle Thailand faced major security threats from colonial powers in the nineteenth century and from communism in the twentieth century yet only in the latter case did the government respond with pro development tactics In Land and Loyalty Tomas Larsson argues that institutional underdevelopment may prove under certain circumstances a strategic advantage rather than a weakness and that external threats play an important role in shaping the development of property regimes Security concerns he finds often guide economic policy The domestic legacies legal and socioeconomic resulting from state responses to the outside world shape and limit the strategies available to politicians While Larsson's extensive archival research findings are drawn from Thai sources he situates the experiences of Thailand in comparative perspective by contrasting them with the trajectory of property rights in Japan Burma and the Philippines
