Gifted Intelligent Machines John Senior, Éva Gyarmathy, 2024-02-13 *The Mental Health of Gifted Intelligent Machines* explores the increasingly sophisticated behaviours of developing AI and how we can ensure it will have emotional resilience ethical strength and an ability to think in a new and enhanced way Its primary aim is to change how we understand the world by investigating humanity as an intelligent being examining and contrasting human and artificial intelligence The book considers what we can learn from the likely mental health issues that will occur with increasingly sophisticated aspects of machine intelligence and how they will reflect the human condition It asks questions about our identity in a deeply uncertain and disruptive ever changing world how we will improve and enhance our psychological intelligence to meet the increasing complications and demands of the future and what we need to do now to be psychologically intelligent enough to live a full meaningful life in a new world evolving around us The book argues that changes in our understanding of mental health psychology and our view of intelligence will challenge huge aspects of our fundamental beliefs and assumptions and that it is
