Psychoanalysis and Psychotherapy, Selected Papers Frieda Fromm-Reichmann, 1959 [The Inner Life of the Dying Person](#) Allan Kellehear, 2014-06-03 This unique book recounts the experience of facing one's death solely from the dying person's point of view rather than from the perspective of caregivers survivors or rescuers Such unmediated access challenges assumptions about the emotional and spiritual dimensions of dying showing readers that along with suffering loss anger sadness and fear we can also feel courage love hope reminiscence transcendence transformation and even happiness as we die A work that is at once psychological sociological and philosophical this book brings together testimonies of those dying from terminal illness old age sudden injury or trauma acts of war and the consequences of natural disasters and terrorism It also includes statements from individuals who are on death row in death camps or planning suicide Each form of dying addressed highlights an important set of emotions and narratives that often eclipses stereotypical renderings of dying and reflects the numerous contexts in which this journey can occur outside of hospitals nursing homes and hospices Chapters focus on common emotional themes linked to dying expanding and challenging them through first person accounts and analyses of relevant academic and clinical literature in psycho-oncology palliative care gerontology military history anthropology sociology cultural and religious studies poetry and fiction The result is an all encompassing investigation into an experience that will eventually include us all and is more surprising and profound than anyone can imagine

On Madness Richard G. T. Gipps, 2022-09-08 Can we reach the psychotic subject in their delusion Psychopathological theorists often try to find a way to characterise this subject's inner predicament so that their opaque utterances and actions will now rationally hang together In this pathbreaking work philosopher and clinical psychologist Richard G T Gipps demonstrates how such efforts at rational retrieval actually result in us setting our face against the psychotic subject in their distress Bringing together patient memoir psychopathological observation and philosophical thought Gipps offers a profound alternative On the one hand he shows how by appreciating just why we can't locate rational order within psychotic thought we can better understand what it is to suffer delusion and psychosis On the other he recovers for us the value of such expressive motivational and symbolic forms of understanding as only become available once we've been turned away at reason's door In such ways Gipps not only solves the psychopathological problem of delusion but also shows us how to bear a

truer witness to the psychotic subject in their brokenness pain and despair
