Psychoanalytic Theories Of Affect Psychoanalytic Theories Of Affect:

Psychoanalytic Theories of Affect Ruth Stein, 2018-03-28 This book collates and clarifies psychoanalytic theories on affect and how they relate to the clinical process The author outlines and analyses the most important theories on affect and examines empirical work presented over the past 100 years exposing the rigidity of some existing notions

PSYCHOANALYTIC THEORIES OF AFFECT RUTH STEIN, 2019-06-14 **Toward a Unified Psychoanalytic Theory** Morris N Eagle, 2021-07-01 Winner of the 2023 American Board and Academy of Psychoanalytic and Psychodynamic Psychology ABAPPP Annual Award This book aims to integrate different psychoanalytic schools and relevant research findings into an integrated psychoanalytic theory of the mind A main claim explored here is that a revised and expanded ego psychology constitutes the strongest foundation not only for a unified psychoanalytic theory but also for the integration of relevant research findings from other disciplines Sophisticated yet accessible the book includes a description of the basic tenets of ego psychology and necessary correctives and revisions It also discusses research and theory on interpersonal understanding capacity for inhibition defense delay of gratification autonomous ego aims and motives affect regulation the nature of psychopathology and the implications of a revised and expanded ego psychology for approaches to treatment The book will appeal to readers who are interested in psychoanalysis the nature of the mind the nature of psychopathology and the implications of theoretical formulations and research findings for approaches to treatment As such it will also be of great value on graduate and training courses for psychoanalysis **Freud, Psychoanalysis, Social Theory** Fred

Weinstein, 2001-01-01 Discusses the reasons for the decline of the cultural influence of psychoanalysis **Psychoanalytic Theory and Clinical Relevance** Louis S. Berger, 2019-01-04 In this provocative contribution to both psychoanalytic theory and the philosophy of science Louis Berger grapples with the nature of consequential theorizing i e theorizing that is relevant to what transpires in clinical practice By examining analysis as a genre of state process formalism the standard format of scientific theories Berger demonstrates why contemporary theorizing inevitably fails to explain crucial aspects of practice His critique in this respect pertains both to the formal structure of psychoanalytic explanation and the technical language through which this structure gains expression The pragmatic recommendations that issue from this critique are illustrated with respect to a number of perennial problem areas besetting analysis and cognate disciplines In a discussion that encompasses theories of affect issues in family therapy the nature of first language acquisition and the philosophical topics of free will and determinism Berger shows that certain systems of representation including ordinary language can describe the psychological realm adequately and that such systems necessarily follow modern physics in rejecting naive assumptions about the separability of theory and practice His proposals culminate in a nonhierarchical conception of psychoanalytic theory that assigns a separate status to the clinically pragmatic level of theorizing In both his critique of contemporary analysis and his reconstructive proposals Berger fuses into a highly readable argument a fascinating range of insights culled

from epistemology linguistics physics logic computer science history and aesthetics More impressively still he demonstrates how an investigation of psychoanalytic theory can serve as a vehicle for examining pervasive epistemological issues in both philosophy and the social sciences

The Affect Theory of Silvan Tomkins for Psychoanalysis and Psychotherapy E. Virginia Demos, 2019-03-04 The Affect Theory of Silvan Tomkins for Psychoanalysis and Psychotherapy explores central issues in current clinical work using the theories put forward by Silvan Tomkins and presenting them in detail as well as integrating them with the most up to date neuroscience findings and infancy research all based on a biopsychosocial dynamic systems approach Part I describes the essentials of life based on our evolutionary and biological heritage namely a need for a coherent understanding of one's world and the capacity to act in that world the infant's capacities are described in detail as embodying both Longitudinal data is provided beginning at birth into the third year of life Part II reviews current debates in psychoanalysis relating to motivation and the lack of an internally consistent theory Recent neuroscience findings are presented which both negate drive theory and support Tomkins theory His theory is then described in detail In Part III two case histories are presented one is a clinical case illustrating one of Tomkins affect powered scripts The second case is drawn from a longitudinal study extending from birth into early adulthood which is made sense of with the help of Tomkins theory Demos concludes with a look at competing approaches to theory and responds to recent cognitive based attempts to disprove both Tomkins work and the latest findings from neuroscience The Affect Theory of Silvan Tomkins for Psychoanalysis and Psychotherapy will appeal to psychoanalysts and psychoanalytic psychotherapists as well as psychiatrists psychologists social workers and psychiatric nurses
