Beyond Greed and Fear Hersh Shefrin, 1999-09-15 Even the best Wall Street investors make mistakes No matter how savvy or experienced all financial practitioners eventually let bias overconfidence and emotion cloud their judgement and misguide their actions Yet most financial decision making models fail to factor in these fundamentals of human nature In *Beyond Greed and Fear* the

most authoritative guide to what really influences the decision making process Hersh Shefrin uses the latest psychological research to help us understand the human behavior that guides stock selection financial services and corporate financial strategy Shefrin argues that financial practitioners must acknowledge and understand behavioral finance the application of psychology to financial behavior in order to avoid many of the investment pitfalls caused by human error Through colorful often humorous real world examples Shefrin points out the common but costly mistakes that money managers security analysts financial planners investment bankers and corporate leaders make so that readers gain valuable insights into their own financial decisions and those of their employees asset managers and advisors According to Shefrin the financial community ignores the psychology of investing at its own peril Beyond Greed and Fear illuminates behavioral finance for today s investor It will help practitioners to recognize and avoid bias and errors in their decisions and to modify and improve their overall investment strategies

Investor Therapy Richard Geist,2003-09-23 If your investing strategy has relied on the facts financial statements annual reports technical charts and so on congratulations You re on the way to becoming a successful complete investor But you re only partway there If the markets are about mood swings turbulence and uncertainty if the herd buys like crazy one day only to sell off the next doesn t it make sense for you to have a grip on the way in which your individual psychological makeup and emotional state affect your investing strategy Doesn t the complete investor need to understand both the facts in his head and the emotions of his heart Dr Richard Geist has combined the art and science of the seemingly unrelated fields of psychology and investing He shows that investing success means both having and using solid information and expertly understanding monitoring and managing your emotions This is the first book directed at professional and individual investors alike illustrating how they can use emotions to become more effective at meeting the ever increasing challenges of today s investing environment Dr Geist s coverage is stimulating and wide ranging including topics such as Recognizing emotional reactions such as confidence and anxiety as clues to making investment decisions Avoiding the most common psychological investment mistakes Analyzing your psychological risk quotient Reacting appropriately when you re caught in a stampeding herd Learning how patience or the lack of it influences investing decisions Responding in psychologically healthy ways to losing money in the market Gaining the psychological skills you need to sell a stock and learning why these skills differ from those needed when making a buy decision Understanding the psychological needs of management while obtaining useful valid information for making informed investing decisions Conventional wisdom says park your emotions at the door when making investing decisions Dr Geist brings a new important perspective to show that the conventional wisdom is not only wrong but harmful to your financial well being Success lies in understanding your emotional reactions to the market and its participants and integrating an emotional understanding of yourself into your investing strategies The successful investor is above all a human investor not a perfect machine like investor

The Psychology of the Stock Market G. C. Selden,2010-01-01 Whether you re up or down at the moment one fact remains the

always behave rationally but in reality we are often swayed by emotions Most financial theories are based on the idea that everyone takes careful account of all available information before making investment decisions However researchers have uncovered a surprisingly large amount of evidence that this is not the case Dozens of examples of irrational behaviour and repeated errors in judgement have been documented in academic studies This book gives plenty of examples of investment mistakes and analyses them from a Behavioural Finance perspective Behavioural Finance is the study of the influence of psychology on the behaviour of investors and their subsequent effect on the markets It combines the discipline of psychology and economics to explain why and how people make irrational or illogical decisions when they make investment decisions
