Book Cooperative Design Visualization Engineering International:

Cooperative Design, Visualization, and Engineering Yuhua Luo, 2004-10-04 As the complexity of design visualization and engineering increases rapidly single user's effort is no longer enough to accomplish ever growing requirements. Group effort becomes essential. There are many industrial areas that demand strong CDVE support such as mechanical engineering, aerospace engineering, architecture design, engineering and building construction, AEC, etc. There are numerous other application areas where cooperative and concurrent working is becoming popular such as entertainment program development, networked gaming, simulation, collaborative learning, etc. Successful cooperative design visualization and engineering highly depend on the advances in fundamental research areas such as concurrent processing, middleware, agent-based methods, design patterns, distributed systems, databases, transport protocols in network communication, human-machine interaction, group behavior, just to name a few. There is a very tight relationship between cooperative design visualization and engineering. Cooperative design will become impossible without cooperative visualization while cooperative engineering processes would not be complete without cooperative design and visualization. From my research experience in the field since 1996 in the Spanish National R D Project CICYT TEL 96 0544 3D Cooperative Design System, Sistemas Cooperativos de Diseño en 3D up to the European Esprit IST Project No. Cooperative Design, Visualization, and Engineering Yuhua
