Political Theology after Metaphysics Derek Brown, 2023-12-01 In *Political Theology after Metaphysics* Derek Brown argues that theologians and religious believers should pursue a revolutionary political theology that can address racism sexism and other forms of oppression in practical ways rather than following the sorts of metaphysical theologies that have dominated theological discourse since at least the scholastic period Relying primarily on Marxist and deconstructive critiques of the ideological function of metaphysics the book engages a wide range of classical and contemporary figures including Karl Marx Søren Kierkegaard Carl Schmitt Jacques Derrida James Cone Chantal Mouffe Cornel West Martin Hoggelund and Karl Ove Knausgaard These engagements are attentive not only to the ways in which these figures critique or defend metaphysics but also to the ways in which they perform political theologies responsive to those critiques While the so called postmodern critique of metaphysics which Brown problematizes as insufficiently critical of political ideology is often read as a challenge to religion Brown's readings suggest that the deconstructive and Marxist critiques of metaphysics present an opportunity for the reemergence of a historical and politically engaged form of religion

The Future of Capitalism Paul Collier, 2018-10-04 FEATURED IN BILL GATES'S 2019 SUMMER READING RECOMMENDATIONS

From world renowned economist Paul Collier a candid diagnosis of the failures of capitalism and a pragmatic and realistic vision for how we can repair it Deep new rifts are tearing apart the fabric of Britain and other Western societies thriving cities versus the provinces the highly skilled elite versus the less educated wealthy versus developing countries As these divides deepen we have lost the sense of ethical obligation to others that was crucial to the rise of post war social democracy So far these rifts have been answered only by the revivalist ideologies of populism and socialism leading to the seismic upheavals of Trump Brexit and the return of the far right in Germany We have heard many critiques of capitalism but no one has laid out a realistic way to fix it until now In a passionate and polemical book celebrated economist Paul Collier outlines brilliantly original and ethical ways of healing these rifts economic social and cultural with the cool head of pragmatism rather than the fervour of ideological revivalism He reveals how he has personally lived across these three divides moving from working class Sheffield to hyper competitive Oxford and working between Britain and Africa and acknowledges some of the failings of his profession Drawing on his own solutions as well as ideas from some of the world's most distinguished social scientists he shows us how to save capitalism from itself and free ourselves from the intellectual baggage of the 20th century
