[The Oxford Handbook of Animal Studies](#) Linda Kalof, 2017-02-01 Intellectual struggles with the animal question how humans can rethink and reconfigure their relationships with other animals first began to take hold in the 1970s Over the next forty years scholars from a wide range of fields would make sweeping reevaluations of the relationship between humans and other animals The Oxford Handbook of Animal Studies brings these diverse evaluations together for the first time paying special attention to the commodification of animals the degradation of the natural world and a staggering loss of animal habitat and species extinction and the increasing need for humans to coexist with other animals in urban rural and natural contexts Linda Kalof maps these themes into the five major categories that structure this volume Animals in the Landscape of Law Politics and Public Policy Animal Intentionality Agency and Reflexive Thinking Animals as Objects in Science Food Spectacle and Sport Animals in Cultural Representations and Animals in Ecosystems Written by international scholars with backgrounds in philosophy law history English art sociology geography archaeology environmental studies cultural studies and animal advocacy the thirty chapters in this handbook investigate key issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings

[The Palgrave International Handbook of Alternative Education](#) Helen E. Lees, Nel Noddings, 2016-08-31 This state of the art comprehensive Handbook fully explores

the field of alternative education on an international scale Alternatives to mainstream schooling and education are becoming increasingly recognised as pertinent and urgent for better understanding what really works in successfully educating children and adults today especially in light of the increased performance driven and managerially organised economic modelling of education that dominates For too long we have wondered what exactly education done otherwise might look like and here we meet individual examples as well as seeing what alternative education is when a collection becomes greater than the sum of parts The Handbook profiles numerous empirical examples from around the world of education being done in innovative and excitingly democratic and autonomous ways from Forest Schools and Home Education through to new technologies neuroscience and the importance of solitude The book also sets out important theoretical perspectives to inform us why seeing education through an alternative lens is useful as well as urgently needed Global in its perspective and definitive in content this one stop volume will be an indispensable reference resource for a wide range of academics students and researchers in the fields of Education Education Policy Sociology and Philosophy as well as educational practitioners

Our Children and Other Animals Matthew Cole,Kate Stewart,2016-05-23 Focusing on the socialization of the human use of other animals as resources in contemporary Western society this book explores the cultural reproduction of human nonhuman animal relations in childhood With close attention to the dominant practices through which children encounter animals and mainstream representations of animals in children s culture whether in terms of the selective exposure of children to animals as pets or as food in the home or in school or the representation of animals in mass media and social media Our Children and Other Animals reveals the interconnectedness of studies of childhood culture and human animal relations In doing so it establishes the importance of human animal relations in sociology by describing the sociological importance of animals in children s lives and children in animals lives Presenting a new typology of the various kinds of human animal relationship this conceptually innovative book constitutes a clear demonstration of the relevance of sociology to the interdisciplinary field of human animal relations and will appeal to readers across the social sciences with interests in sociology childhood studies cultural and media studies and human animal interaction

Methods in Human-Animal Studies Annalisa Colombino,Heide K. Bruckner,2023-06-07 This timely book provides a methodological guide for how to conduct and theorise research in human animal studies In response to critiques of the anthropomorphic slant to human animal research and the increasing political relevance of animals in contemporary environmental debates this book emphasises methods which bring to light the animal side of multispecies encounters Drawing from the interdisciplinary strength of human animal studies this book contains contributions from practitioners and scholars working in sociology anthropology ethology and geography Each chapter uses a case study approach to present a theoretical framework and empirical application of cutting edge methods in human animal studies from creative writing in multispecies ethnographies to visual methods like videography and body mapping Organized in three parts theorizing collaborating visualizing the book

equips readers with methodological tools to conduct human animal studies research attentive to animal lives Furthermore chapters reflect on the opportunities limitations and ethical considerations of research that seeks to understand our more than human worlds The book is aimed towards undergraduate and graduate students in human animal studies and scholars investigating human animal relations It will also be of interest to practitioners and policy makers who engage with conservation wildlife management or the human animal interface of urban and regional planning

Anglo-Saxon Literary Landscapes Heide Estes,2025-10-01 Literary scholars have traditionally understood landscapes whether natural or manmade as metaphors for humanity instead of concrete settings for people s actions This book accepts the natural world as such by investigating how Anglo Saxons interacted with and conceived of their lived environments Examining Old English poems such as Beowulf and Judith as well as descriptions of natural events from the Anglo Saxon Chronicle and other documentary texts Heide Estes shows that Anglo Saxon ideologies which view nature as diametrically opposed to humans and the natural world as designed for human use have become deeply embedded in our cultural heritage language and more

Animals in the Sociologies of Westermarck and Durkheim Salla Tuomivaara,2019-09-04 This book explores why animals at some point disappeared from the realm and scope of sociology The role of sociology in the construction of a science of the human has been substantial building representations of the human sphere of life as unique Within the sociological tradition however animals have often been invisible even non existent Through in depth comparisons of the texts of prominent early sociologists Emile Durkheim and Edward Westermarck Tuomivaara shows that despite this exclusion representations of animals and human animal relations were far more varied in early works than in the later sociological cannon Addressing a significant gap in the interdisciplinary field of animal studies Tuomivaara presents a close reading of the historical treatment of animals in the works of Durkheim and Westermarck to determine how the human animal boundary was established in sociological theory The diverse forms in which animals and the animal appear in the works of early classical sociology are charted and explored alongside the sociological themes that bring animals into these texts Situated in contemporary theory from critical animal studies to posthumanism this important book lays the groundwork for a disciplinary shift away from this sharp human animal dualism

Animal Oppression and Capitalism David Nibert,2017-09-08 This important two volume set unapologetically documents how capitalism results in the oppression of animals ranging from fish and chickens to dogs elephants and kangaroos as well as in environmental destruction vital resource depletion and climate change Most traditional narratives portray humanity s use of other animals as natural and necessary for human social development and present the idea that capitalism is generally a positive force in the world But is this worldview accurate or just a convenient easy to accept way to ignore what is really happening a systematic oppression of animals that simultaneously results in environmental destruction and places insurmountable obstacles in the path to a sustainable and peaceful future David Nibert s *Animal Oppression and Capitalism* is a timely two volume set that calls into question the

capitalist system at a point in human history when inequality and the imbalance in the distribution of wealth are growing domestically and internationally Expert contributors show why the oppression of animals particularly the use of other animals as food is increasingly being linked to unfavorable climate change and the depletion of fresh water and other vital resources Readers will also learn about the tragic connections between the production of animal products and global hunger and expanded regional violence and warfare and they will understand how many common human health problems including heart attacks strokes and various forms of cancer develop as a result of consuming animal products The Animal Inside Geoffrey Dierckxsens, Rudmer Bijlsma, Michael Begun, Thomas Kiefer, 2016-12-07 Much has been written about animals in applied ethics environmental ethics and animal rights This book takes a new turn offering an examination of the animal question from a more fundamental philosophical anthropological perspective The contributors in this important volume focus on how the animal has appeared and can be used in philosophical argumentation as a metaphor or reference point that helps us understand what is distinctively human and what is not A recurring theme in the essays is the existence of a zone of ambiguity between animals and humans which puts into question comfortable assumptions about the uniqueness and superiority of human nature While the chapters straddle the boundaries of historical philosophical and systematic continental and analytic approaches their thematic unity knits them together presenting a rich broad and yet cohesive perspective The first part of the book offers general explorations of the relation between animal and human nature and of the concomitant existential and ethical dimensions of this relationship The chapters in the second part address the same theme but in so doing focus on specific aspects of animal and human nature imagination politics history sense finitude and science
