Propaganda in the Helping Professions Eileen Gambrill, 2012-02-20 Propaganda in the helping professions has grown by leaps and bounds in recent decades with alarming implications for clients and their families as well as the professionals who try to help them There is a fog that has been generated by corporate interests and organizations attempting to sell their services and products to desperate or poorly educated consumers Propaganda in the Helping Professions is a guide to lifting the confusion From phrenology to institutional crib beds for adult psychiatric patients from Roman bird beak masks to drugs designed to combat overurination readers are taken on a tour across the centuries of egregious practices of professionals and quacks including the present day medicalization of our lives The author one of the field's most relentless critics of fads phonies and fallacies shows readers how to think critically about both research and advertising in order to deliver effective services to clients and not be bamboozled by bogus claims about alleged problems risks and remedies Incisive interesting eminently readable and passionately argued this book places responsibility for client well being both on consumers to raise questions and on the professionals who claim to help them to accurately answer them

Critical Thinking for Helping Professionals Eileen Gambrill, Leonard Gibbs, 2017-04-25 Critical thinking values skills and knowledge are integral to evidence based practice in the helping professions Inflated claims of knowledge both in the media as well as in the peer reviewed literature show critical thinking to be ever more important to decrease the influence of marketing in the guise of scholarship Practitioners must be able and willing to think critically about decisions that affect clients lives This requires minimizing the influence of cognitive and affective biases such as hindsight bias and avoiding misleading framing of problems that may harm clients but contribute to the profit of involved industries e g ignoring environmental sources of distress and focusing on client characteristics This book continues to focus on engaging students as active participants in exercises designed to hone their critical thinking skills drawing on related research and theory in a variety of related areas including judgement and decision making Exercises are included to help students enhance their skills in the process of evidence based practice including posing clear relevant questions and locating and critically appraising related research This fourth edition of *Critical Thinking for Helping Professionals* is for students of helping professions including social work nursing counseling and psychology Decision making skills guided by an ethical compass are vital in all helping professions
