

PSICOLOGÍA DEL ARTE

Psicología del Arte es el ámbito psicológico que estudia los fenómenos de la creación y la apreciación artística desde una perspectiva psicológica.

Trata de elaborar teorías acerca de la actividad creativa como de la perceptiva.

el Arte une al creador de su obra, consigo mismo y con el resto del mundo; es un modo de comunicación que sigue pautas muy específicas y singulares, por ejemplo en la música, será el sonido, en la pintura los materiales pictóricos, en la literatura la letra misma, en la escultura diferentes materiales según las épocas, en la danza el movimiento; sin embargo, esto por si solo nos limita, ya que en la obra de arte también está, la historia, el momento cultural, lo religioso, lo político, lo económico, lo institucional, etc., además de que por medio de su realizador, hace realidad sus fantasías internas, es un testigo y da cuenta de las diferentes épocas de la vida del ser humano.

Psicología del arte y la estética

Robert Frances,2005-04-01 Este trabajo colectivo es fundamentalmente una síntesis de los resultados establecidos por las investigaciones de las ciencias humanas y en especial por las de la psicología en el dominio del arte y más generalmente en el de la estética La psicología del arte toma como base de estudio aquellas obras que las instituciones culturales consideran dignas de ser designadas y conservadas como obras de arte Pero estas obras sea cual fuere su importancia para el conocimiento de los comportamientos de las funciones estéticas del ser humano no son las únicas en estimular estos comportamientos y de las funciones estéticas del ser humano no son las únicas en estimular estos comportamientos y en ejercer tales funciones En todas las sociedades hay un campo más amplio cuyos límites son difíciles de trazar que suscita respuestas análogas a las que provocan las obras de arte y que no solamente incluye los elementos sensoriales que los artistas utilizan por ejemplo los sonidos y los colores aislados o en combinaciones simples las proporciones etc sino también los aspectos ornamentales o formales del marco de vida de los objetos fabricados del propio cuerpo etc Este campo se integra poco a poco en la psicología de la estética en la medida en que le son dedicados trabajos científicos En algunos casos como en el de los equilibrios ptimos visuales o auditivos la integración está plenamente consolidada ya que las primeras experiencias sobre la sección urea o los acordes de dos sonidos precedieron a las propias investigaciones sobre las obras pictóricas En otros casos cuando por ejemplo se hace referencia a paisajes naturales o al propio cuerpo los estudios por el contrario son muy recientes lo que no es óbice para que en el presente texto se encuentre un capítulo relativo a los aspectos estéticos o icónicos del cuerpo y otro a los del entorno construido En pocas palabras uno de los caracteres distintivos de la presente obra radica en no ser sólo una síntesis de investigaciones tradicionales sobre la psicología del arte sino también un balance de investigaciones frontera en el campo del arte y en el de la estética

Arts - Therapies - Communication European Arts Therapy Line Kossolapow, Sarah Scoble, 2005 Stipulation of a present actual position of Art Therapy however inevitably leads to further thoughts about ongoing development Everything required for the theoretical practical founding of a European Art Therapy as discipline still has to be done including construction of a communicative bridge to partners in other continents or countries This development work has two strands of development One follows a more theoretical direction with European Art Therapy as a research and teaching subject as an objective in view The other is directed more towards practical fieldwork which in turn can lead to the establishment of funds of experience as well as quantitative and qualitative investigations and thus to theoretical methodical statements In the contributions on hand both connections pervade Naturally the individual articles in this collection do not fully expound the volume of art therapeutic work throughout Europe but they are a source of information and inspiration for the user from theory and or practice who can then find his particular niche with his own specific interests within the cross section and subsequently continue the discourse spatially and objectively
