Medication Review			
Client Report Reports no noticeable change in ability to focus, no reduction in symptoms.			
Compliance Good compliance, remembering to take medication twice daily with reminder app on her phone			
Side Effects Helen reports she had headaches in the first week which have eased off, and some exaggeration of symptoms in the afternoon as medication wears off. No weight loss, no insomnia.			
Change(s) to Medication Increase to 15mg methylphenidate twice daily			
Progress Note			
Helen continues to struggle with focussing during meetings and completing tasks required of her. She has made good steps to incorporating exercise and healthy diet into her routine, but still struggles with listening comprehension, remaining focussed, keeping track of time and executive function.			
Her side effects have been minimal and have eased off in the past week, so I recommend we increase methylphenidate dose and review in the next session- particularly to review development of "rebound" symptoms in late afternoon.			
Additional Note			
Will see Helen in two weeks to review increased dosage.
