Provided by publisher **Psychodynamic Interventions in Pregnancy and Infancy** Björn Salomonsson, 2018-04-17 Psychodynamic Interventions in Pregnancy and Infancy builds on Björn Salomonsson's experiences as a psychoanalytic consultant working with parents and their babies Emotional problems during the perinatal stages can arise and be observed and addressed by a skilled midwife nurse or health visitor Salomonsson has developed a method combining nurse supervision and therapeutic consultations which has lowered the thresholds for parents to come and talk with him The brief consultations concern pregnant women mother and baby husband and wife toddler and parent The theoretical framework is psychoanalytic but the mode of work is eclectic and adapted to the family's situation and its members' motivation This book details such work which can be applied globally perinatal psychotherapy integrated with ordinary medical health care It also explains how psychotherapy can be made more accessible to a larger population Via detailed case presentations the author takes the reader through pregnancy childbirth and the first few years of life He also brings in research studies emphasizing the importance of early interventions with the aim of providing therapists with arguments for such work in everyday family

health care To further substantiate such arguments the book ends with theoretical chapters and finally the author's vision of the future of a perinatal health care that integrates medical and psychological perspectives Psychodynamic Interventions in Pregnancy and Infancy will appeal to all psychoanalysts and psychoanalytic psychotherapists working in this area as well as clinical psychologists clinical social workers and medical personnel working with parents and infants **Lacanian**

Psychoanalysis with Babies, Children, and Adolescents Stephanie Farrelly Quinn, Carol Owens, 2018-03-29 Lacan did not say or write very much about the psychoanalysis of children There is no doctrine of the psychoanalysis of children in his work Instead his 1956 1957 seminar on the object relation and his Note on the Child of 1969 have been adopted by Lacanian analysts working with children as providing essential coordinates for direction in their clinical work This book is the result of inviting psychoanalysts of the Lacanian orientation working with children around the globe to theorise and conceptualise that work The Lacanian psychoanalyst works with the notion of the subject as a speaking being but the child subject brings particular exigencies to the psychoanalytic work Contributors attend to these exigencies in their essays by articulating the precise particularities of the direction of the treatment and psychoanalytic work with children *Discovering Françoise*

Dolto Kathleen Saint-Onge, 2019-05-22 This psychobiographical study of the renowned French pediatrician and psychoanalyst Fran oise Dolto introduces both her theories of child development and her unique insights into language and identity A friend of Jacques Lacan's Dolto believed that we are all humanized through language and that the words we use carry unconscious traces of our early histories of love suffering and desire Suggesting that infants unconsciously symbolize and that a continuous circulation of unconscious affects the transference prevails in all language based relations her findings challenge assumptions about autism autobiography linguistics literacy pedagogy and therapy Dolto's own corpus a rich archive blending the personal and professional demonstrates this with echoes between Dolto's constructs about the child and her own challenging childhood This fascinating book will not only introduce the work of Fran oise Dolto to many readers but will be a valuable resource for all psychoanalytic researchers and theorists interested in childhood language and identity *The*

Classroom as Privileged Space Tapo Chimbhanda, 2017-07-28 The Classroom as Privileged Space Psychoanalytic Paradigms for Social Justice in Pedagogy examines the psychic and emotional effects of the dehumanization of children based on social discrimination and difference within schooling Used as a tool to critique the current state of social justice within education psychoanalysis allows for a focus on the individual within the social context of schooling It highlights the emotional structures that can develop in children and learners through the oft repeated trauma of racism and homophobia This book draws from the articulated experiences of three writers and urges the reader to approach the work of the writers and this book as a witness and as one who is enabled to respond through acquiring knowledge and acting on it Drawing from scholars in psychoanalysis sociology and education Tapo Chimbhanda posits that perhaps the safe space education has been touting is not what is necessary to cultivate diversity equity and inclusion in classrooms Rather privilege re imagined through

psychoanalytic technique can make possible the elements of social justice that have long frustrated silenced and escaped the classroom *Rethinking Autism with Dolto* Kathleen Saint-Onge, 2024-03-04 *Rethinking Autism with Dolto* takes up a principal legacy of Fran oise Dolto s immense project her conviction that autism is a regression to the archaic Dolto theorizes that the infant in utero deep in dreams is receptive to the audition of phonemes during the pre conscious archaic stage of psychosexual maturation That dream work on words an idiosyncratic prehistory at the onset of mental and emotional life secures the unconscious circulation of affect and the ontogeny of thought long prior to speech seeding associative thinking and facilitating self regulation Kathleen Saint Onge uses the written work of four nonverbal autistic authors in seeking corroboration for Dolto s formulations finding thoughtful self reflections that relate the experience of living in silence with relentless anxiety while relying on regression as a defence Dolto s unprecedented insights into the infant s earliest learning carry formidable implications for autism interventions and for primary language and literacy At issue is an enduring susceptibility to archaic echoes the haphazard securing return of pre invested phonemes in communicative exchanges including reading and writing *Rethinking Autism with Dolto* considers unconscious processes as inherently reparative heralding the responsibility education holds for human health and supports a rethinking of autism that presumes competence Readers are invited to new conversations in psychoanalysis child development education and linguistics through an exploration of the unconscious concomitants of first language acquisition **Pleasure Erased** Catherine

Malabou, 2022-06-24 The clitoris was absent in anatomy books in paintings and sculptures absent in spirit and even body it has long been the organ of erased pleasure We assume that this oversight has been repaired in our times today the clitoris is not forgotten but honoured Conferences books manifestos works of art are all devoted to it The autonomy of clitoral jouissance is recognized The boundaries of feminism have also moved queer intersex and trans approaches claim that the clitoris is perhaps no longer the exclusive preserve of the woman And yet there remains a wounded space Because genital mutilation is still common practice Because millions of women are still denied pleasure The clitoris continues to mark the enigmatic space of the feminine Constrained by the extreme difficulty and the extreme urgency of returning to this scorched earth it is time to give voice to an organ of pleasure which has still not become an organ of thought *Cumulated Index*

Medicus , 1993 *Handbook of Family Violence* Alan S. Bellack, Michel Hersen, R.L. Morrison, Vincent B. Van Hasselt, 2013-06-29 In the last decade there has been heightened clinical and investigative activity in the area of family violence This of course is partly attributable to recent surveys showing a high incidence of family violence in the United States For example there are indications that nearly 30% of married women in this country are victims of physical abuse by spouses at some point in their marriage Further FBI statistics show that approximately 13% of all homicides are husband wife killings Moreover it has been projected that such figures are likely to increase over the next several years Consistent with these trends funding of family violence research by both federal and private agencies has increased Indeed federal

agencies such as the National Institute of Mental Health and the National Institute of Law Enforcement and Criminal Justice have provided considerable support for work in this area. In addition, family violence, particularly wife battering, child abuse, and sexual abuse of children, has been the focus of media attention at the national level and has generated intensive interest in both lay and professional publications. Moreover, there have been several recent governmental hearings and investigations regarding the prevalence of these problems.
