Zou, Riza Yosia Sunindijo, 2015-06-15 Although the construction and engineering sector makes important contributions to the economic social and environmental objectives of a nation it has a notorious reputation for being an unsafe industry in which to work Despite the fact that safety performance in the industry has improved injuries and fatalities still occur frequently To address this the industry needs to evolve further by integrating safety into all decision making processes Strategic Safety Management in Construction and Engineering takes a broad view of safety from a strategic decision making and management perspective with a particular focus on the need to balance and integrate science and art when implementing safety management The principles covered here include the economics of safety safety climate and culture skills for safety safety training and learning safety in design risk management building information modelling and safety research methods and the research practice nexus They are integrated into a strategic safety management framework which comprises strategy development implementation and evaluation Practical techniques are included to apply the principles in the context of the construction and engineering industry and projects Case studies are also provided to demonstrate the localised context and applications of the principles and techniques in practice

Re-envisioning Theoretical Psychology Thomas Teo, 2019-05-29 This volume presents a re-envisioning of the field of theoretical psychology and offers unique visions for its present and future from leaders of North American philosophical

psychology It contends that theoretical psychology has reached middle age and must consider new directions to renew its growth Rooted in a range of research traditions and the intellectual biographies of its authors it paves the way toward this necessary revitalization of the content activities responsibilities and hopes of theoretical psychology The authors situate their analyses in the context of the increasing gap between alternative and mainstream and between the discipline and the profession of psychology They demonstrate that changes in society culture and technology the internationalization of the psychological humanities and the cross fertilization of intellectual innovations from other disciplines now afford possibilities for new orientations in theoretical psychology The volume aims to do justice to psychological topics human beings and the intellectual problems that psychologists encounter while also providing space for meta theoretical engagement often neglected in the discipline Together the chapters in this collection make the case that a renewal of the discipline and practice of psychology is a task that is best accomplished collectively and despite significant disagreements in solidarity
