Psychology without Foundations Steve D Brown, Paul Stenner, 2009-08-03 For many years for many people social psychology has been deemed a discipline in crisis This new book proposes a way out of the crisis by letting go of the idea that psychology needs new foundations or a new identity whether biological discursive or cognitive The psychological is not narrowly confined to any one aspect of human experience it is quite literally everywhere The book proposes a strong process oriented approach to the psychological which studies events or occasions Aspects of experience such as communication or embodiment are treated as thoroughly mediated the product of multiple intersecting relationships between the biological the psychic and the social The outcome is an image of a mobile reflexively founded discipline which follows the psychological wherever it takes us from the depths of embodiment to the complexities of modern global politics

Discursive Psychology Cristian Tileagă, Elizabeth Stokoe, 2015-08-27 Discursive Psychology is the first collection to systematically and critically appraise the influence and development of its foundational studies exploring central concepts in social psychology such as attitudes gender cognition memory prejudice and ideology The book explores how discursive psychology has accommodated and responded to assumptions contained in classic studies discussing what can still be gained from a dialogue with these inquiries and which epistemological and methodological debates are still running or are worth reviving International

contributors look back at the original ideas in the classic papers and consider the impact on and trajectory of subsequent work Each chapter locates a foundational paper in its academic context identifying the concerns that motivated the author and the particular perspective that informed their thinking The contributors go on to identify the main empirical theoretical or methodological contribution of the paper and its impact on consequent work in discursive psychology including the contributors own work Each chapter concludes with a critical consideration of how discursive psychology can continue to develop This book is a timely contribution to the advance of discursive psychology by fostering critical perspectives upon its intellectual and empirical agenda It will appeal to those working in the area of discursive psychology discourse analysis and social interaction including researchers social psychologists and students

Memory in the Wild Brady Wagoner, Ignacio Brescó de Luna, Sophie Zadeh, 2020-07-01 Venturing out of the laboratory into the wild of natural settings it becomes untenable to locate memory strictly in the head Instead memory appears as a materially extended and socially distributed process embedded within culture and history This book explores the complex relations between practices of remembering and the settings in which they are enacted It advances a novel set of concepts developed from ecological cognitive cultural and narrative currents in psychology and further afield to analyze 1 trajectories of autobiographical remembering 2 the relation between individual and collective memory 3 memory and cultural transmission as well as 4 various methodological techniques to investigate memory in the wild
