The Crimes and Sentencing Kai Ambos, Alexander Heinze, Peter Rackow, Eric Armbricht, 2022 International criminal law and justice is a flourishing field which has led in recent years to new international

criminal tribunals and new mechanisms for investigation and holding criminals to account. These developments have in turn led to an increasing volume and greater consolidation of case law and even more scholarly attention. The second edition of this volume of Kai Ambos seminal treatise has been revised and rewritten in parts to provide coverage of recent developments in the Special Part of international criminal law namely the specific crimes and sentencing. Amongst other updates there are significant extensions of the discussion on sexual and gender based crimes the introduction of environmental crimes into international criminal law further elaboration on the nexus requirement in war crimes and asymmetrical conflicts e.g. ISIS and reference to the newly introduced war crimes of the ICC Statute and of the peculiarities of cyber attacks and other emerging activities. The volume complements Volume I of the treatise on issues relevant to the foundations general part of international criminal law and general principles of international criminal justice. Taken together with the other new editions of the three volume series this second edition provides an exhaustive guide to every aspect of international criminal law from fundamental principles to procedures and implementation. Kai Ambos Treatise remains an indispensable reference work for academics and practitioners of international criminal law.

Principles of International Criminal Law Gerhard Werle, Florian Jeßberger, 2014-08-14. Principles of International Criminal Law has become one of the most influential textbooks in the field of international criminal justice. It offers a systematic and comprehensive analysis of the foundations and general principles of substantive international criminal law including thorough discussion of its core crimes. It provides a detailed understanding of the general principles sources and evolution of international criminal law demonstrating how it has developed and how its application has changed. After establishing the general principles the book assesses the four key international crimes as defined by the statute of the International Criminal Court: genocide crimes against humanity war crimes and the crime of aggression. This new edition revises and updates work with developments in international criminal justice since 2009. It includes new material on the principle of culpability as one of the fundamental principles of international criminal law the notion of terrorism as a crime under international law the concept of direct participation in hostilities the problem of so called unlawful combatants and the issue of targeted killings. The book retains its highly acclaimed systematic approach and consistent methodology making the book essential reading for both students and scholars of international criminal law as well as for practitioners and judges working in the field.

A Critical Introduction to International Criminal Law Carsten Stahn, 2019. Presents theories practices and critiques alongside each other to engage students scholars and professionals from multiple fields. This title is also available as Open Access on Cambridge Core.

Complicity in International Criminal Law Marina Aksenova, 2016-12-15. This book tackles one of the most contentious aspects of international criminal law the modes of liability. At the heart of the discussion is the quest for balance between the accused's individual contribution and the collective nature of mass offending. The principle of legality demands that there exists a well defined link between the crime and the person charged with it. This is so even in the context of international

offending which often implies several degrees of separation between the direct perpetrator and the person who authorises the atrocity The challenge is to construct that link without jeopardising the interests of justice This monograph provides the first comprehensive treatment of complicity within the discipline and beyond Extensive analysis of the pertinent statutes and jurisprudence reveals gaps in interpreting accessorial liability Simultaneously the study of complicity becomes a test for the general methods and purposes of international criminal law The book exposes problems with the sources of law and demonstrates the absence of clearly defined sentencing and policy rationales which are crucial tools in structuring judicial discretion Awarded The Paul Guggenheim Prize in International Law 2017 De facto International Prosecutors in a Global Era

Melinda Rankin, 2022-08-18 In the past decades great strides have been made to ensure that crimes against humanity and state sponsored organized violence are not committed with impunity Alongside states large international organizations such as the United Nations and forums such as the International Criminal Court de facto international prosecutors have emerged to address these crimes Acting as investigators and evidence gathers to identify individuals and officials engaged in serious human rights violations these private non state actors and state legal officials in a foreign court pursue criminal accountability for those most responsible for core international crimes They do so when local options to investigate fail and an international criminal tribunal remains unavailable This study outlines three case studies of witnesses and victims who pursue those most responsible including former heads of state It examines their practices and strategies and shows how witnesses and victims of core crimes emerge as key leaders in the accountability process **Postgenocide** Klejda

Mulaj, 2021-03-15 This volume introduces postgenocide as a novel approach to study genocide and its effects after mass killing has ended It investigates how the material violence of genocide translates into contests over memory remembrance and laws and the re imagining of political community Contributions come from academics across a broad range of disciplines including law political science sociology and ethnography Chapters in this volume explore the various permutations of genocide harms and scrutinise the efficacy of genocide laws and the prospects for their enforcement Others engage with socio political responses to genocide including efforts to reconciliation as well as genocide s impacts on victims communities Contributions examine the reconstruction of genocide narratives in the display of victims objects in museums galleries and archives This book brings together cutting edge research from a variety of disciplines to address formerly overlooked themes and cases exploring what a diversity of perspectives can bring to bear on genocide scholarship as a whole Green

Transitional Justice Rachel Killeen, Lauren Dempster, 2025-06-30 This book rethinks the boundaries of transitional justice urging scholars and practitioners to confront the often overlooked nexus between mass violence and ecological harm Through an in depth analysis of the field s limitations such as its anthropocentric legalism neocolonial practices and alignment with neoliberalism the book critiques the historical marginalisation of Nature in transitional justice discourse and practice It argues that ignoring environmental harm not only undermines the possibility of holistic justice but also

perpetuates structural violence and inequality In response the book sketches a greener transitional justice integrating principles from environmental justice Indigenous knowledge systems and ecocentric perspectives It explores the possibilities of recognising Nature as a victim of mass violence adapting existing mechanisms to incorporate environmental harm and fostering transformative approaches premised on the interdependence of human and ecological well being This book is written for students researchers and practitioners of transitional justice and fields related to conflict transformation peacebuilding environmental protection and development

Universal Jurisdiction in International Criminal Law

Aisling O'Sullivan, 2017-02-03 With the sensational arrest of former Chilean dictator Augusto Pinochet in 1998 the rise to prominence of universal jurisdiction over crimes against international law seemed to be assured The arrest of Pinochet and the ensuing proceedings before the UK courts brought universal jurisdiction into the foreground of the fight against impunity and the principle was read as an important complementary mechanism for international justice one that could offer justice to victims denied an avenue by the limited jurisdiction of international criminal tribunals Yet by the time of the International Court of Justice's Arrest Warrant judgment four years later the picture looked much bleaker and the principle was being read as a potential tool for politically motivated trials This book explores the debate over universal jurisdiction in international criminal law aiming to unpack a practice in which international lawyers continue to disagree over the concept of universal jurisdiction Using Martti Koskeniemi's work as a foil this book exposes the argumentative techniques in operation in national and international adjudication since the 1990s Drawing on overarching patterns within the debate Aisling O'Sullivan argues that it is bounded by a tension between contrasting political preferences or positions labelled as moralist ending impunity and formalist avoiding abuse and she reads the debate as a movement of hegemonic and counter hegemonic positions that struggle for hegemonic control However she draws out how these positions moralist formalist merge into one another and this produces a tendency towards a middle position that continues to prefer a particular preference moralist or formalist Aisling O'Sullivan then traces the transformation towards this tendency that reflects an internal split among international lawyers between building a utopia court of humanity and recognizing its impossibility of being realized
