WIS-44 INSTRUCTION MANUAL

Congratulations on purchasing the Royal WIS-44 Thermosolutions Weather Station. This model features indoor and outdoor temperature and humidity, time, minimum and maximum temperature and humidity, alarms and weather forecasting. Outside temperature and humidity is provided with the 43-4150Hz cable free temperature sensor. No wire installation is required. The WIS-44 can work with up to 3 remote sensors. One remote sensor is included with this package.

Please read all the instructions to ensure understanding of the features.

The WIS-44 uses a liquid crystal display. On occasion, the display has an appearance of being damaged. This is especially true when first receiving the unit, or when using the unit. It is recommended leaving the unit on a flat table for 10 minutes. The liquid in the display will fill all the voided areas.

REMOTE UNIT

A. LED Light
B. Test Button

1. Mode Button
2. Max/hold Button
3. Min/Alarm Button
4. Celsius/F

Fig. 2

BEFORE YOU BEGIN

For best operation:

1. Insert the remote unit batteries before inserting the batteries into the main unit.
2. Place the main unit as close as possible next to the remote unit. This will ensure easier synchronization between the transmission and reception of the signals.
3. Position the remote unit and main unit within the effective transmission range, which, in usual circumstances, are 70 to 100 feet.

Fig. 3

NOTE: After changing the batteries in the transmitter or base unit, both units must be completely reset as per the Setting Up Instructions.

INSTALLATION OF THE BATTERIES IN THE MAIN UNIT

The WIS-44 uses two "AA" batteries. Should the LCD become dimmer, or the battery icon on the display shows, replace the battery. To install or replace the batteries, please follow these steps:

1. Slide the battery door cover off in the direction of the arrow.
2. Insert 2 AA batteries, following the polarity shown inside the battery compartment.
3. Replace battery cover.

SETTING UP

1. Once the batteries have been placed in the Remote unit, they will start transmitting temperature readings in 30 seconds. By depressing the slide test button on the Remote unit, the signal to the base unit will immediately update the outside temperature. The LCD on the remote unit will illuminate after depressing the test button. This indicates the signal is being sent.
2. It is recommended testing the units side by side prior to installing the units.
3. Consumer should not modify the product.

Once the units synchronize, install the units as per the INSTALLATION SECTION of this manual.
