7 Configure the sensitivity and lock set the sensor.

Select the sensitivity appropriate for the application (see options below), replace the front cover, and apply power to the sensor. Right after the LED stage flashing (see the LED operation section), walk through the detection zones, observing the sensor's LED whenever motion is detected. The red LED shows which alarm entry operation.

The audible range of all PIR units is subject to variation because of different types of clothing, backgrounds, and ambient temperature. For this reason, expect that the most likely intruder motion is well within the PIR's detection zones and that with testing is carried out during these trials.

High Sensitivity 1-2 Steps
High Sensitivity and Auto Count 1's
Note: This is the recommended setting for applications with a single or multiple motion zone and a single point of the coverage area. Recommended to help security applications.

Note: For High Security applications, use the High Security lens, disable the LED (S1=OFF), and set the sensitivity to High (S1 and S2=ON).
