Psychopathology At School Theorizing Mental Disorders In Education:

Psychopathology at School Valerie Harwood, Julie Allan, 2014-03-26 *Psychopathology at School* provides a timely response to concerns about the rising numbers of children whose behaviour is recognised and understood as a medicalised condition rather than simply as poor behaviour caused by other factors It is the first scholarly analysis of psychopathology which draws on the philosophers Foucault Deleuze Guattari and Arendt to examine the processes whereby children s behaviour is pathologised The heightened attention to mental disorders is contrasted with education practices in the early and mid to late twentieth century and the emergence of a new conceptualization of childhood is explored Taking education as a central component to the contemporary experience of growing up the book charts the ways in which mental disorders have become commonplace in childhood and youth from birth through to college and university but also offers examples of where professionals have refused to pathologise children s behaviour The book examines the extent of the influence of psychopathology on the lives of children and young people as well as the practices that infiltrate education and the possibilities for alternative educational responses that negate the diagnosis of mental disorder *Psychopathology at School* is a must read for anyone concerned about the growing influence of psychopathology in education and will be of particular interest to educated readers and to scholars students and professionals in education psychiatry psychology child studies youth studies nursing social work and sociology

Filmed School James Stillwaggon, David Jelinek, 2016-05-12 *Filmed School* examines the place that teaching holds in the public imaginary through its portrayal in cinema From early films such as *M dchen in Uniform* and *La Maternelle* to contemporary images of teaching in *Notes on a Scandal* and *The History Boys* teachers roles in film have been consistently contradictory portraying teachers as both seducers and selfless heroes social outcasts and moral models contributing to a similarly divided popular understanding of teachers as both salvific and sinister In this book Stillwaggon and Jelinek present these contradictory images of teaching through the concept of transference the fantastical belief in another s knowing that founds a teacher s authority in relation to her students and to some degree the public at large Tracing the place of transference across a century of school films each chapter demonstrates the persistence of this fantasy in one of the dreams or nightmares of teaching that recurs thematically in school films the teacher as savior seducer signifier in a moribund discourse and sacrificial object Through these analyses the authors suggest that something might be missing in our attempts to theorize education when we leave our unthought fantasies of teaching out of the picture This book will be of key interest to academics researchers and postgraduate students in the fields of educational theory teacher education philosophy of education film and media studies psychoanalysis sociology of education curriculum studies and cultural studies

Handbook of Historical Studies in Education Tanya Fitzgerald, 2020-04-03 This book offers an in depth historiographical and comparative analysis of prominent theoretical and methodological debates in the field Across each of the sections contributors will draw on specific case studies to illustrate the origins debates and tensions in the field

and overview new trends directions and developments Each section includes an introduction that provides an overview of the theme and the overall emphasis within the section In addition each section has a concluding chapter that offers a critical and comparative analysis of the national case studies presented As a Handbook the emphasis is on deeper consideration of key issues rather than a more superficial and broader sweep The book offers researchers postgraduate and higher degree students as well as those teaching in this field a definitive text that identifies and debates key historiographical and methodological issues The intent is to encourage comparative historiographical perspectives of the nominated issues that overview the main theoretical and methodological debates and to propose new directions for the field

On the Politics of Educational Theory Tomasz Szkudlarek, 2016-11-03 On the Politics of Educational Theory considers the political significance of educational theory as a specific genre of public discourse Rather than understanding educational theories solely as addressing issues of childrearing and instruction this book aims to view educational theories in a broader socio political context It explores the role of educational theories in the construction of collective and political identities and analyses them as rhetorical strategies operating as political discourses Defining the methodological framework through the perspectives of Michel Foucault and Ernesto Laclau each chapter examines the ways in which theories of education contribute to the creation of social realities and identities Such issues as the construction of visibility and invisibility of power the tropes of temporality or the use of postulational language where theorists say what should be done in and by education are some of the threads that weave through particular theories from Rousseau to the discourse of education in the knowledge based society analysed as ontological rhetorics constitutive of political identities This book suggests a direction for a more conscious way of dealing with the political in education As such it will appeal to researchers academics and postgraduate students in the fields of educational research philosophy of education curriculum studies social and political theory and theory of education The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781315712505> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

On the Self: Discourses of Mental Health and Education Julie Allan, Valerie Harwood, 2022-09-24 This book examines the emergence of psychologised discourses of the self in education and considers their effects on children and young people on relationships both in and out of school and on educational practices It undertakes a Foucauldian genealogy of the discourses of the self in education in order to scrutinise the focal points of experience for children and young people Part One of the book offers a critical analysis of the discourses of the self that operate within interventions of self esteem self concept self efficacy and self regulation and their incursions into education Part Two provides counter narratives of the self drawn principally from the arts and politics and providing alternative and potentially radical ways of when and how the self might speak It also articulates how teachers may support children and young people in giving voice to these counter narratives as they move through school

The Impact of New Health Imperatives on Educational Policy and Schooling Jan Wright, Valerie Harwood, 2016-02-05 Currently a great deal of public discourse around health is on the assumed relationship between childhood inactivity young people s diets and a putative steep rise in obesity Children and young people are increasingly being identified as a population at risk in relation to these health concerns Such concerns are driving what might be described as new health imperatives which prescribe the choices young people should make around lifestyle physical activity body regulation dietary habits and sedentary behaviour These health imperatives are a powerful force driving major policy initiatives on health and education in a number of countries in the Western world Schools in particular have been targeted

for the implementation of a plethora of initiatives designed to help children and young people lose weight become more active and change their eating patterns inside and outside school Addressing these issues requires an innovative theoretical approach Neither the fields of eating disorders nor obesity research has addressed these issues from a sociological and pedagogical perspective The contributors to this edited collection draw on a range of social theories including Michel Foucault and Basil Bernstein to interpret the data collected across three countries Australia and New Zealand United Kingdom and from a range of primary and secondary schools Each chapter addresses various aspects of the relationship between health imperatives as constituted in government policies school programs and practices their recontextualised in school practices and the impact of this on the subjectivities of children and teachers This book was originally published as a special issue of Discourse Studies in the Cultural Politics of Education

The SAGE Handbook of Inclusion and Diversity in Education Matthew J. Schuelka, Christopher J. Johnstone, Gary Thomas, Alfredo J. Artiles, 2019-09-30 This handbook examines policy and practice from around the world with respect to broadly conceived notions of inclusion and diversity within education It sets out to provide a critical and comprehensive overview of current thinking and debate around aspects such as inclusive education rights philosophy context policy systems and practices for a global audience This makes it an ideal text for researchers and those involved in policy making as well as those teaching in classrooms today Chapters are separated across three key parts Part I Conceptualizations and Possibilities of Inclusion and Diversity in Education Part II Inclusion and Diversity in Educational Practices Policies and Systems Part III Inclusion and Diversity in Global and Local Educational Contexts
