Cunningham and Nathan H. Nazdrowicz present the findings of this massive undertaking This definitive guide combines nearly 160 comprehensive new herpetological maps with historical distribution maps and in depth species accounts Color photos illustrate the natural history of the 89 species of frogs salamanders turtles snakes and lizards that call the state home Essays discuss historical studies the effects of Maryland s current climate geology and habitat diversity and the myriad conservation issues these animals face This richly detailed book represents a triumph of citizen science and the culmination of an intensive research partnership It will appeal to both amateurs and professionals interested in herpetology natural history or ecology as well as those with a special interest in Maryland s biodiversity
