A Non-Random Sampling Method (Classic Reprint) Robert D. Richtmyer, 2018-02-05 Excerpt from A Non Random Sampling Method During the past ten years several studies have been made of systematic non random sampling methods for calculations of the monte Carlo type based on theorems of H Weyl on the asymptotic distribution in n space of a set of points generated by congruences The object is to find a computing method similar to monte Carlo in which the error of the approximation decreases more rapidly with increasing sample size than when random sampling is used Although the method has not yet achieved success in practical applications there seems to be enough interest in it to warrant giving an account About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works , **Collected Reprints** , 1993 **Collected Reprints** Southwest Fisheries Center (U.S.), 1984 *Statistics for Ecologists Using R and Excel* Mark Gardener, 2017-01-16 This is a book about the scientific process and how you apply it to data in ecology You will learn how to plan for data collection how to assemble data how to analyze data and finally how to present the results The book uses Microsoft Excel and the powerful Open Source R program to carry out data handling as well as producing graphs Statistical approaches covered include data exploration tests for difference t test and U test correlation Spearman s rank test and Pearson product moment association including Chi squared tests and goodness of fit multivariate testing using analysis of variance ANOVA and Kruskal Wallis test and multiple regression Key skills taught in this book include how to plan ecological projects how to record and assemble your data how to use R and Excel for data analysis and graphs how to carry out a wide range of statistical analyses including analysis of variance and regression how to create professional looking graphs and how to present your results New in this edition a completely revised chapter on graphics including graph types and their uses Excel Chart Tools R graphics commands and producing different chart types in Excel and in R an expanded range of support material online including example data exercises and additional notes a new chapter on basic community statistics biodiversity and similarity chapter summaries and end of chapter exercises Praise for the first edition This book is a superb way in for all those looking at how to design investigations and collect data to support their findings Sue Townsend Biodiversity Learning Manager Field Studies Council M makes it easy for the reader to synthesise R and Excel and there is extra help and sample data available on the free companion webpage if needed I recommended this text to the university library as well as to colleagues at my student workshops on R Although I initially bought this book when I wanted to discover R I actually also learned new techniques for

data manipulation and management in Excel Mark Edwards EcoBlogging A must for anyone getting to grips with data analysis using R and excel Amazon 5 star review It has been very easy to follow and will be perfect for anyone Amazon 5 star review A solid introduction to working with Excel and R The writing is clear and informative the book provides plenty of examples and figures so that each string of code in R or step in Excel is understood by the reader Goodreads 4 star review
