Water Cycles

Every plant and animal on Earth needs water. People use water the most. The more people there are, the more water is used. Water moves through the **environment**. This means water never goes away. We can not get the same amount of water in one place every year. The amount of water on Earth does not change, but in some places there is not enough water, and in others, there is too much. Also, in some places, you might not be able to drink the water because it is **polluted**.

Environment: where a person or animal lives

Harm: to do something bad to someone

Pollute: to put bad things into the water or air

TIME For Kids Nonfiction Readers: Advanced Teacher's Guide Chandra Prough, 2012-07-01

Teacher Shortages and the Challenge of Retention Barbara J. Smith, 2023-05-15 Without taking the time to unravel the complexities of the teaching profession many may assume that teachers are people who enjoy working with children and making a difference in their lives While some teachers may be drawn to the summers off or the winter and spring breaks it is doubtful that such shallow incentives propel most individuals to come to or remain in the profession By identifying the obstacles it is possible to generate new contexts for practice that can not only limit the challenges but create conditions for teachers and students to thrive This book shares ideas about what such changes could be like how change could benefit teachers and students alike and how it could influence a positive shift in society Before addressing significant reforms in teacher practice it is important to outline what kinds of experiences make the teacher profession attractive to some and not to others Taking a closer look at teacher's stories what drives them to stay and leave what makes them feel empowered or not and what makes them feel fulfilled in the role is this starting point for further exploration
