Wolfgang M. Freitag

Mies Van Der Rohe At Work:

Mies Van Der Rohe at Work Peter Carter, 1974 This comprehensive study of the work of one of modern architecture's founding fathers and creator of the Barcelona Pavilion and the Seagram Building breaks new ground in its field in that its author English architect Peter Carter writes from over a decade's personal experience first as a student and subsequently as a close associate and friend of the late Ludwig Mies van der Rohe from book jacket *Mies van der Rohe - The Built Work* Carsten Krohn, 2014-06-17 This essential and comprehensive Mies monograph focuses in its analysis on Mies design intentions it reconstructs the buildings in their original state examines them from the present day perspective and rediscovers the inspiring architecture of a great modern master The book presents eighty of Mies works in chronological order Approximately thirty of these works are analyzed in detail in three parts In the first part the construction is documented in its built state for this all the ground plans were redrawn by the author The second part outlines the changes to the buildings and the third part develops the results of this investigation with regard to their relevance to the contemporary view of Mies work **Mies van der Rohe** Franz Schulze, Edward Windhorst, 2020-03-04 An excellent new edition of the definitive biography of the architectural genius with more than a hundred photos Booklist starred review Upon publication this book was praised by the Chicago Tribune and the most comprehensive book ever written about the master designer and by any measure the best while the Christian Science Monitor noted that Schulze has both the gift of an architectural historian able to render Mies's building innovations and that of a biographer able to paint the humanity and shortcomings of the man Newsweek called it a revelation Now this biography of the iconic modernist architect and designer has been extensively updated providing an even more enlightening and intimate portrait of a man who helped to create the twentieth century world This excellent revised edition has 138 illustrations incisive descriptions of Mies innovative creations and a fascinating account of his Pyrrhic victory in a lawsuit against his disaffected client Edith Farnsworth Booklist starred review This authoritative biography of Mies van der Rohe has been updated through building records the recollections of students and a court transcript It's a gripping read Christopher Woodward Building Design **Mies Van Der Rohe at Work** Peter Carter, Ludwig Mies van der Rohe, 1999 **Mies Van Der Rohe** Jean-Louis Cohen, 1996 Examines the life and work of the architect Mies van der Rohe *The Barcelona Pavilion by Mies van der Rohe* Dietrich Neumann, 2020-12-07 While Mies van der Rohe's pavilion at the International Exposition in Barcelona in 1929 went unnoticed by most of the visitors to the fairgrounds contemporary critics enthusiastically hailed it as the most convincing statement of the Modern Age This book presents 100 selected texts about this much discussed building written then and now from the opening speech by the Spanish king to newspaper articles and private letters voices of contemporary architects architecture critics and historians and even a text by artist Ai Weiwei who created an installation in the outdoor area of the pavilion in 2010 Thus the history of this building's reception depicts a dazzling picture and inconceivable breadth including statements by such

eminent authors as Frank Lloyd Wright Leonardo Benevolo Rem Koolhaas Peter Eisenman **Interiors and Interiority**
Ewa Lajer-Burchardth, Beate Söntgen, 2015-11-13 Veranschaulichungsformen von Innerlichkeit finden in der Moderne in
Darstellungen des Interieurs ihr prägnantes Bild Die Beiträge der Publikation untersuchen die Verbindungen zwischen
architektonischen Innenräumen visuellen und literarischen Darstellungen von Interieurs und dem Konzept der Innerlichkeit
vom 18. Jahrhundert bis heute Jene Darstellungen sind Effekt aber auch Produzenten spezifischer Vorstellungen von
Innerlichkeit als einer wenn nicht der subjektkonstituierenden Praxis der Moderne *Bauhaus 1919-1933* Barry
Bergdoll, Leah Dickerman, 2009 The Bauhaus the school of art and design founded in Germany in 1919 and shut down by the
Nazis in 1933 brought together artists architects and designers in an extraordinary conversation about modern art Bauhaus
1919-1933 published to accompany a major multimedia exhibition at MoMA is the first comprehensive treatment of the
subject by MoMA since 1938 and offers a new generational perspective on the 20th century's most influential experiment in
artistic education It brings together works in a broad range of mediums including industrial design furniture architecture
graphics photography textiles ceramics theatre and costume design and painting and sculpture many of which have rarely if
ever been seen outside of Germany Featuring about 400 colour plates and a rich range of documentary images this
publication includes two overarching images by the exhibition's curators Leah Dickerman and Barry Bergdoll concise
interpretive essays on key objects by over twenty leading scholars and an illustrated narrative chronology *Photographic
Architecture in the Twentieth Century* Claire Zimmerman, 2014-05-01 One hundred years ago architects found in the medium
of photography so good at representing a building's lines and planes a necessary way to promote their practices It soon
became apparent however that photography did more than reproduce what it depicted It altered both subject and reception
as architecture in the twentieth century was enlisted as a form of mass communication Claire Zimmerman reveals how
photography profoundly influenced architectural design in the past century playing an instrumental role in the evolution of
modern architecture Her picture anthropology demonstrates how buildings changed irrevocably and substantially through
their interaction with photography beginning with the emergence of mass printed photographically illustrated texts in
Germany before World War II and concluding with the postwar age of commercial advertising In taking up photographic
architecture Zimmerman considers two interconnected topics first architectural photography and its circulation and second
the impact of photography on architectural design She describes how architectural photographic protocols developed in
Germany in the early twentieth century expanded significantly in the wartime and postwar diaspora and accelerated
dramatically with the advent of postmodernism In modern architecture she argues how buildings looked and how
photographs made them look overlapped in consequential ways In architecture and photography the modernist concepts that
were visible to the largest number over the widest terrain with the greatest clarity carried the day This richly illustrated
work shows for the first time how new ideas and new buildings arose from the interplay of photography and architecture

transforming how we see the world and how we act on it *Art Books* Wolfgang M. Freitag, 2013-10-28 First published in 1997 For this second edition of *Art Books A Basic Bibliography of Monographs on Artists* the vast number of new books published since 1985 was surveyed and evaluated This has resulted in the selection of 3 395 additional titles These selections reflective of the increase in the monographic literature on artists during the last ten years are evidence of the activities of a larger number of art historians in more countries worldwide of the increasingly diverse and ambitious exhibition programs of museums whose number has also increased dramatically and also of a lively international art market and the attendant gallery activities The selections of the first edition have been reviewed errors have been corrected and important new editions and reprints have been noted The second edition contains 278 names of artists not represented in the first edition
