Migration Theory Talking Across Disciplines:

Migration Theory Caroline Brettell, James Frank Hollifield, 2000 First published in 2000 **Migration Theory** Caroline B. Brettell, James F. Hollifield, 2014-08-25 During the last decade the issue of migration has increased in global prominence and has caused controversy among host countries around the world To remedy the tendency of scholars to speak only to and from their own disciplinary perspective this book brings together in a single volume essays dealing with central concepts and key theoretical issues in the study of international migration across the social sciences Editors Caroline B Brettell and James F Hollifield have guided a thorough revision of this seminal text with valuable insights from such fields as anthropology demography economics geography history law political science and sociology Each essay focuses on key concepts questions and theoretical frameworks on the topic of international migration in a particular discipline but the volume as a whole teaches readers about similarities and differences across the boundaries between one academic field and the next How for example do political scientists wrestle with the question of citizenship as compared with sociologists and how different is this from the questions that anthropologists explore when they deal with ethnicity and identity Are economic theories about ethnic enclaves similar to those of sociologists What theories do historians the essentializers and demographers the modelers draw upon in their attempts to explain empirical phenomena in the study of immigration What are the units of analysis in each of the disciplines and do these shape different questions and diverse models and theories Scholars and students in migration studies will find this book a powerful theoretical guide and a text that brings them up to speed quickly on the important issues and the debates All of the social science disciplines will find that this book offers a one stop synthesis of contemporary thought on migration **Migration** Michael Samers, Michael Collyer, 2016-12-08 While the subject of migration has received enormous attention in academic journals and books across the social sciences introductory texts on the matter are few and far between Even fewer books have explored migration through a critical and explicit engagement with spatial concepts Now in its second edition *Migration* remains the only text in more than a decade that emphasizes how geographical or spatial concepts can be used critically to understand migration The multi disciplinary text draws on insights from human geography political science social anthropology sociology and to a lesser extent economics All of the chapters focus on key terms theories concepts and issues concerning migration and immigration The book argues that in the context of migration two opposing spatial positions have emerged in the wake of the critique of methodological nationalism On one hand is the significance of transnationalism and on the other the importance of sub national or local processes Both require more nuance and integration while many of the concepts and theories which have thus far neglected space or have not been treated spatially need to be re written with space in mind Pedagogically the text combines a carefully defined structure accessible language boxes that explore case studies of migrant related experiences in particular places annotated suggestions for further reading useful websites and relevant films and summary questions for student learning at the end of

each chapter Migration provides a critical multi disciplinary advanced and theoretically informed introduction to migration and immigration Revised and updated with new material new maps and illustrations and an accompanying website <https://migration2ndedition.wordpress.com> it continues to be aimed at advanced undergraduates and Masters level graduate students undertaking courses on migration and immigration

Migration, Risk and Uncertainty Allan M. Williams, Vladimír Baláž, 2014-08-07 Migration is one of the driving forces of economic and social change in the modern world It is both informed by risk and a generator of risk whether for individuals households communities or societies Although the relationship between migration and risk is widely acknowledged it has long been neglected in academic research with a few exceptions such as household diversification strategies Instead risk is assumed to be implicit in economic or social models rather than being explicitly theorised or analysed This book represents the first major review of these key relationships It draws on a wide range of theories from economics psychology sociology anthropology and geography and an equally broad range of empirical material to provide a highly original overview

Migrant Letters Marcelo J. Borges, Sonia Cancian, 2019-10-23 The migrant letter whether written by family members lovers friends or others is a document that continues to attract the attention of scholars and general readers alike What is it about migrant letters that fascinates us Is it nostalgia for a distant yet desired past Is it the consequence of the eclipse of letter writing in an age of digital communication technologies Or is it about the parallels between transnational experiences in previous mass migrations and in the current globalized world and the centrality of interpersonal relations mobility and communication then and now Influenced by methodologies from diverse disciplines the study of migrant letters has developed in myriad directions Scholars have examined migrant letters through such lenses as identity and self making family relations gender and emotions This volume contributes to this discussion by exploring the connection between the practice of letter writing and the emotional economic familial and gendered experiences of men and women separated by migration It combines theoretical and empirical discussions which illuminate a variety of historical experiences of migrants who built transnational lives as they moved across Europe Africa Latin America and the United States This volume was originally published as a special issue of *The History of Family*
