Resources in Education, 1998 **Evaluation of Knowledges and Understandings Acquired by Students in Collegiate Elementary Economics Apposite to a Selected Problem** Charles Marion Key, 1969 *The Social Sciences and Rationality* Hudson Meadwell, 2017-10-19 In recent decades rational choice theory has emerged as the single most powerful controversial claimant to provide a unified theoretical framework for all the social sciences In its simplest form the theory postulates that humans are purposive beings who pursue their goals in a rational efficient manner seeking the greatest benefit at the lowest cost This volume brings together prominent scholars working in several social science disciplines and the philosophy of science to debate the promise and problems of rational choice theory As rational choice theory has spread from its home base in economics to other disciplines it has come under fierce criticism To its critics the extension of the explanatory model mistakenly assumes that the logic of economic rationality can explain non economic behavior and at its worst commits the ethnocentric error of imposing Western concepts of rationality on non Western societies and cultures This volume includes strong advocates as well as forceful critics of the rational choice approach However in contrast to previous debates all the contributors share a commitment to open constructive and knowledgeable dialogue Well known advocates of rational choice theory Michael Hechter Michael Smith Chris Manfredi explicitly ponder some of its serious limitations while equally well known critics Ian Shapiro Mario Bunge strike a surprisingly conciliatory tone in contemplating its legitimate uses Vociferous critics of neoclassical economics Bunge favorably discuss sociological proponents of rational choice theory while two economists who are not particularly anti mainstream Robin Rowley George Grantham critically assess the problems of such assumptions in their discipline Philosophers Storrs McCall and sociologists John Hall alike reflect on the variable meaning of rationality in explaining social behavior In the introduction and conclusion the editors survey the current state of the debate and show how open constructive dialogue enables us to move beyond hackneyed accusations and dismissals that have characterized much previous debate **The Future of Sustainability** Ray C. Anderson, Ian Spellerberg, Daniel E. Vasey, 2012-10-31 The Future of Sustainability the tenth and final volume of the Berkshire Encyclopedia of Sustainability brings together essays from a group of renowned scholars and well known environmentalist thinkers Crucial topics are considered in terms of the future of humanity and its relationship with the natural world from the outlook for nuclear energy cities energy agriculture water food security mobility and migration the role of higher education and the concept of collective learning The volume concludes with a resource guide for teaching materials at several levels a directory of leading undergraduate and graduate level programs in sustainability and a combined index of the 10 volume set **Institutional Finance for Agricultural Development** Bhupat Maganlal Desai, 1993 Agricultural and rural credit in the developing countries **The Dynamic Firm** Alfred D. Chandler, Peter Hagström, Örjan Sölvell, 1999-09-23 Business Strategy is becoming increasingly pluralist drawing on the insights of different disciplines and

business practice in different parts of the world This book brings together the work and ideas of leading international scholars working in the field under three main headings Technology Strategy and Organization and Regions The purpose of the book is to explore from different perspectives the dynamic interplay between the technology of a firm its strategies organizational choices and issues of place region and location The contributors are Peter Hagstr m Alfred Chandler Takahiro Fujimoto Richard Nelson Nathan Rosenberg Erik von Hippel Cristiano Antonelli Giovanni Dosi Benjamin Coriat David Teece Gunnar Hedlund Pari Patel Keith Pavitt Ikujiro Nonaka Hirotaka Takeuchi Lars Gunnar Mattsson John Cantwell John Dunning Michael Enright Masahisa Fujita Ryoichi Ishii Allen Scott Orjan Solvell Ivo Zander J C Spender and Michael Porter Together they address the challenge of explaining the long run competitiveness of firms in an ever more global world This book will be a benchmark for anybody wanting to keep abreast of leading edge strategic thinking *Principles of Law and Economics*
