Reading Musical Interpretation Julian Hellaby,2017-07-05 Performance studies in the Western art music tradition have often been dominated by the relationship of theoretical score analysis to performance although some recent trends have aimed at dislodging the primacy of the score in favour of assessing performance on its own terms In this book Julian Hellaby further develops these trends by placing performance firmly at the heart of his investigations and presents a structured approach to analysing the interpretation of a musical work from the perspective of a musically informed listener To enable analysis of individual interpretations the author develops a conceptual framework in which a series of performance related categories is arranged hierarchically into an interpretative tower Using this framework to analyse the acoustic evidence of a recording interpretative elements are identified and used to assess the relationship between a performance and a work The viability of the interpretative tower is tested in three major case studies Contrasting recorded performances of solo keyboard works by Bach Messiaen and Brahms are the focus of these studies and analysis of

the performances using the tower model uncovers an interpretative rationale The book is wide ranging in scope and holistic in approach offering a means of enhancing a listener s appreciation of an interpretation It is richly illustrated with examples taken from commercial recordings and from the author s own recordings of the three focal works Downloadable resources of the latter are included Analyzing Atonal Music Michiel Schuijjer,2008 For the past 40 years pitch class set theory has served as a frame of reference for the study of atonal music through the efforts of Allan Forte Milton Babbitt and others This text combines thorough discussions of musical concepts with an historical narrative *Music in Our Lives* Jonathan L. Friedmann,2014-12-17 Music research has entered something of a Golden Age Technological advances and scholarly inquiry have merged in interdisciplinary studies drawing on psychology neuroscience evolutionary biology anthropology and other fields that illuminate the musical nature of our species This volume develops supports and challenges that body of research examining key issues in the field such as the difficulty of writing about music the formation of musical preferences the emotional impact of musical sounds the comparison of music and language the impulse for making music and the connection between music and spirituality **Music and Humanism** R. A. Sharpe,2000 The metaphor of music as a language has exerted a deep influence on the way we think about music and the way we hear it we conceive of music as expressive and as something to be understood These two ideas underpin the thought that it is a humanist art Sharpe suggests that Western music may have entered a new period in which the language analogy and the humanist conception are becoming less and less appropriate BOOK JACKET
