Nice Book Stars Beneath Us Finding Evolving:

Stars Beneath Us Paul Wallace, 2016-03-01 In ways both confident and gentle *Stars Beneath Us* brilliantly shows God's presence in the ever evolving cosmos Relying on his upbringing as a Baptist his doctoral work in experimental nuclear physics and gamma ray astronomy and his ordination to the gospel ministry in the Cooperative Baptist Fellowship Paul Wallace weaves a book unlike any other in faith and science literature Instead of engaging the debates of natural theology or proofs for the existence of God this is a call to courage for those who fear a true encounter with the cosmos will distance them from God With a winsome mix of compelling personal narrative and insightful biblical analysis the author calls into perspective the scale of the cosmos and our place within it Relying on a theology of openness to the world *Stars Beneath Us* will inspire readers to engage with the natural world in new ways and find God as it turns out everywhere *Finding our Place in the Solar System* Todd Timberlake, Paul Wallace, 2019-03-28 *Finding our Place in the Solar System* gives a detailed account of how the Earth was displaced from its traditional position at the center of the universe to be recognized as one of several planets orbiting the Sun under the influence of a universal gravitational force The transition from the ancient geocentric worldview to a modern understanding of planetary motion often called the Copernican Revolution is one of the great intellectual achievements of humankind This book provides a deep yet accessible explanation of the scientific disputes over our place in the solar system and the work of the great scientists who helped settle them Readers will come away knowing not just that the Earth orbits the Sun but why we believe that it does so The Copernican Revolution also provides an excellent case study of what science is and how it works *Theodicy and Hope in the Book of the Twelve* George Athas, Beth M. Stovell, Daniel Timmer, Colin M. Toffelmire, 2021-06-03 This volume explores the themes of theodicy and hope in both individual portions of the Twelve books and sub sections and in the Book of the Twelve as a whole as the contributors use a diversity of approaches to the text s with a particular interest in synchronic perspectives While these essays regularly engage the mostly redactional scholarship surrounding the Book of Twelve there is also an examination of various forms of literary analysis of final text forms and engagement in descriptions of the thematic and theological perspectives of the individual books and of the collection as a whole The synchronic work in these essays is thus in regular conversation with diachronic research and as a general rule they take various conclusions of redactional research as a point of departure The specific themes theodicy and hope are key ideas that have provided the opportunity for contributors to explore individual books or sub sections within the Twelve and the overarching development in both historical and literary terms and deployment of these themes in the collection **Faith and Science in the 21st Century** Peter M. Wallace, 2018-08-17 With contributions from eight noted theologians this book builds on popular videos from the Day 1 radio Science or faith The battle rages from millennials and GenXers questioning the relevance of religion to older adults who doubt the validity of science and vice versa but these two are not mutually exclusive They can in fact be mutually enriching and complimentary once their proper

domains are understood and respected The Episcopal Church with its tradition of the via media offers an ideal setting for conversations seeking to bridge the often antagonistic perspectives on both sides Faith and Science in the 21st Century presents a way to start that conversation Built on existing videos produced by the popular Day 1 program with assistance from a John Templeton Foundation grant this series features notable faith leaders across the denominational spectrum in 3 to 5 minute video presentations on scientific topics in which they are experts Intended for use in a variety of settings including congregations schools and campus ministries it can be presented as an eight session series of studies but each session can also stand on its own for a one time formation offering A single video download will offer all video presentations This Leader Guide enables facilitators to foster fruitful discussions of each session topic It includes an introduction about the program and how it can be used and eight detailed session plans to utilize with a downloadable video sold separately on the Day 1 website Uncontrolling Love L Michaels,Gloria Coffin,Craig Drurey,Chris Baker,Donna Fiser Ward,Graden

Kirksey,2017-08-07 What if God is not in control And what if instead God always expresses uncontrolling love Eighty leading thinkers explore the implications of a new way to think about God the world and our everyday lives Their conclusions are radical whether their writing is in story form or more academic Essayists take ideas in Thomas Jay Oord s award winning book The Uncontrolling Love of God An Open and Relational Account of Providence IVP Academic Each contributor explores how we might think and live in light of uncontrolling love Riverin, Modern Impressions Book 2 Riverin,2009-12 Riverin

Modern Impressions book 2 shows 150 recent paintings all different from the first art book It also contains a chapter Spirituality and Philosophy behind the Artwork a short story and his autobiography **Creation and Evolution in the Early American Scientific Affiliation** Mark A. Kalthoff,2021-10-17 Originally published in 1995 Creation and Evolution in the Early American Scientific Affiliation is the tenth volume in the series Creationism in Twentieth Century America reissued in 2021 The volume comprises of original primary sources from the American Science Affiliation a group formed following an invitation from the president of the Moody Bible Institute in Chicago in answer to the perceived need for an academic society for American Evangelical Scientists to explicate the relationship between science and faith The society confronted the debate between creation and evolution head on leaving a paper trail documenting their thoughts and struggles This diverse and expansive collection includes 53 selections that appeared during the organisation s first two decades and focuses on the encounter between science and American evangelicalism in the twentieth century in particular the debates surrounding the ever increasing preference for evolutionary theory The collection will be of especial interest to natural historians and theologians as well as academics of philosophy and history **Evolution and the Big Questions** David N.

Stamos,2011-09-23 Evolution and the Big Questions David N Stamos s Evolution and the Big Questions delivers what its title promises you get to look at all of the issues such as race and ethics and religion that make the study of evolution so interesting and more than just a science The book is written in a clear and friendly manner and deserves a very wide

readership Michael Ruse Florida State University This provocative text considers whether evolutionary explanations can be used to clarify some of life's biggest questions It offers a lively informative and timely look at a wide variety of key issues facing all of us today including questions of race sex gender the nature of language religion ethics knowledge consciousness and ultimately the meaning of life Some of the questions examined are Did evolution make men and women fundamentally different Is the concept of race merely a social construction Is morality including universal human rights a mass delusion Can religion and evolution really be harmonized Does evolution render life meaningless Designed for students and anyone with an interest in the relationship between evolutionary heritage and human nature the text takes an interdisciplinary approach and offers direction for further reading and research Each chapter presents a main topic together with discussion of related ideas and arguments from various perspectives Along the way it poses life's biggest questions pulling no punches and presenting a challenge to thinkers on all levels

Intelligent Evolution Michael A. Flannery, Alfred Russel Wallace, 2020-08-12 Alfred Russel Wallace 1823-1913 co-discoverer of natural selection was second only to Charles Darwin as the 19th century's most noted English naturalist Yet his belief in spiritualism caused him to be ridiculed and dismissed by many leaving him a comparatively obscure and misunderstood figure In this volume Wallace is finally allowed to speak in his own defense through his grand evolutionary synthesis *The World of Life* published over a century ago in 1910 More than just a reprinting of a near forgotten work Michael A. Flannery places Wallace in historical context and includes the very latest historiography relating to both Darwin and Wallace in his detailed introduction Flannery exposes Charles Darwin's now famous theory of evolution as little more than a naturalistic cover for an extreme philosophical materialism borrowed as a youth from Edinburgh radicals This is juxtaposed by his sympathetic account of what he calls Wallace's intelligent evolution a thoroughly teleological alternative to Darwin's stochastic processes Though based upon very different formulations of natural selection the Wallace-Darwin dispute as presented by Flannery shows a metaphysical clash of worldviews coextensive with modern evolutionary theory itself design and purpose versus randomness and chance This book is for anyone seeking to understand the historical and philosophical roots of a controversy that still rages today This book contains an abridgement of Alfred Russel Wallace's *The World of Life* and Reverend John Mages Mello's essay *The Mystery of Life and Mind* Michael A. Flannery is Professor Emeritus UAB Libraries University of Alabama at Birmingham Professor Flannery has published extensively in medical history and bioethics winning the prestigious Edward Kremers Award in 2001 for distinguished writing by an American from the American Institute of the History of Pharmacy the Murray Gottlieb Prize in history by the Medical Library Association in 2002 and the 2006 Publishers Award of the Archivists and Librarians in the History of Health Sciences This is his tenth book
