Clementi,D. Fornasari,C. Gotti,2012-12-06 Neuronal nicotinic receptors are key molecules for signal transduction in a number of neuronal pathways They are widely distributed in the brain and are known to be involved in cognitive tasks including learning and memory in smoking addiction and in several brain diseases such as Alzheimer s and Parkinson s dementias schizophrenia and epilepsy This book provides a comprehensive review of the field starting with a historical perspective and dealing with the molecular structure of these receptors their biophysical and pharmacological properties their distribution in central and peripheral nervous systems and their major involvement in brain functions Particular emphasis is paid to drugs both new and old that are useful in the diagnosis and treatment of diseases involving neuronal nicotinic receptors Finally the relevance of these receptors in smoking addiction is carefully evaluated together with future trends and the latest results **Subject Guide to Books in Print** ,1991 *Forthcoming Books* Rose Arny,2000 **Neurotransmitter Interactions and Cognitive Function** Edward D. Levin,2006-11-18 Cognitive function involves the participation of many different neurotransmitter systems in a variety of brain areas The centerpiece of investigation regarding cognitive function has classically been the cholinergic system but it has become increasingly clear that other transmitter systems interact with cholinergic systems to provide the neural basis for cognitive function This book brings together cutting edge research to determine how the transmitter interactions form the mechanistic bases for attention learning and memory This research on transmitter interactions not only provides a more accurate though complex picture of how the brain works to provide cognitive function it also provides important new levels of understanding about the mechanisms of cognitive dysfunction and novel avenues for therapeutic treatment The researchers who contributed to this volume both reviewed the latest findings but also point to the directions of advancement of the field of neurotransmitter interactions and cognitive function
