Frederic Leighton Keren Rosa Hammerschlag, 2017-07-05 Keren Rosa Hammerschlag's *Frederic Leighton Death Mortality Resurrection* offers a timely reexamination of the art of the late Victorian period's most institutionally powerful artist Frederic Lord Leighton 1830 1896 As President of the Royal Academy from 1878 to 1896 Leighton was committed to the pursuit of beauty in art through the depiction of classical subjects executed according to an academic working method But as this book reveals Leighton's art and discourse were beset by the realisation that academic art would likely die with him Rather than achieving classical perfection Hammerschlag argues Leighton's figures hover in transitional states between realism and idealism flesh and marble life and death as gothic distortions of the classical ideal The author undertakes close readings of key paintings sculptures frescos and drawings in Leighton's oeuvre and situates them in the context of contemporaneous debates about death and resurrection in theology archaeology and medicine The outcome is a pleasurable macabre counter biography that reconfigures what it meant to be not just a late Victorian neoclassicist and royal academician but President of the Victorian Royal Academy

The Oxford History of Western Art Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the

development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the re definition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students "The British

School of Sculpture, c.1760-1832 " Sarah Burnage,2017-07-05 The British School of Sculpture c 1760 1832 represents the first edited collection exploring one of the most significant moments in British art history returning to centre stage a wide range of sculpture considered for the first time by some of the most important scholars in the field Following a historical and historiographical introduction by the editors situating British sculpture in relation to key events and developments in the period and the broader scholarship on British art more generally in the period and beyond the book contains nine wide ranging case studies that consider the place of antique and modern sculpture in British country houses in the period monuments to heroes of commerce and the Napoleonic Wars the key debates fought around ideal sculpture at the Royal Academy the reception of British sculpture across Europe the reception of Hindu sculpture deriving from India in Britain and the relationship of sculpture to emerging industrial markets both at home and abroad Challenging characterisations of the period as neoclassical the volume reveals British sculpture to be a much more eclectic and various field of endeavour both in service of the state and challenging it and open to sources ranging from the newly arrived Parthenon Frieze to contemporary print culture
