Practicing Mortality Art Philosophy And Contemplative Seeing:

Practicing Mortality C. Dustin, J. Ziegler, 2016-04-30 A collaborative undertaking between an artist and a philosopher this monograph attempts to deepen our understanding of contemplative seeing by addressing the works of Plato Thoreau Heidegger and more The authors explore what it means to see reality and contemplate how viewing reality philosophically and artfully is a form of spirituality In this way by developing a new conception of active visual engagement the authors propose a way of seeing that unites both critical scrutiny and spiritual involvement as opposed to simple passive reception

Reimagining the Call to Teach David T. Hansen, 2021 In this sequel to his acclaimed *The Call to Teach* David Hansen revisits the idea of teaching as a calling in light of contemporary prospects in education He shows why the call to teach walks hand in hand with teaching as the holistic practice of being with students in their interaction with subject matter one another and their larger life experience The book is a sequel not merely a new edition thoroughly re written and re researched to expand original premise of *The Call to Teach*

Socratic Philosophy and Its Others Denise Schaeffer, Christopher Dustin, 2013-06-20 The overall aim of the volume is to explore the relation of Socratic philosophizing as Plato represents it to those activities to which it is typically opposed The essays address a range of figures who appear in the dialogues as distinct others against whom Socrates is contrasted most obviously the figure of the sophist but also the tragic hero the rhetorician the tyrant and the poet Each of the individual essays shows in a different way that the harder one tries to disentangle Socrates own activity from that of its apparent opposite the more entangled they become Yet it is only by taking this entanglement seriously and exploring it fully that the distinctive character of Socratic philosophy emerges As a whole the collection sheds new light on the artful ways in which Plato not only represents philosophy in relation to what it is not but also makes it strange to itself It shows how concerns that seem to be raised about the activity of philosophical questioning from the point of view of the political community for

example can be seen upon closer examination to emerge from within that very enterprise Each of the essays then goes on to consider how Socratic philosophizing can be defined and its virtues defended against an attack that comes as much from within as from without The volume includes chapters by distinguished contributors such as Catherine Zuckert Ronna Burger Michael Davis Jacob Howland and others the majority of which were written especially for this volume Together they address an important theme in Plato's dialogues that is touched upon in the literature but has never been the subject of a book length study that traces its development across a wide range of dialogues One virtue of the collection is that it brings together a number of prominent scholars from both political science and philosophy whose work intersects in important and revealing ways A related virtue is that it treats more familiar dialogues Republic Sophist Apology Phaedrus alongside some works that are less well known Theages Major Hippas Minor Hippas Charmides and Lovers While the volume is specialized in its topic and approach the overarching question about the potentially troubling implications of Socratic philosophy and the Platonic response should be of interest to a broad range of scholars in philosophy political science and classics

The Many Faces of Relativism Maria Baghramian, 2015-10-14 This book is a study of relativism as a dominant intellectual preoccupation of our time Relativism asks how we are to find a way out of intractable differences of perspectives and disagreements in various domains Standards of truth rationality and ethical right and wrong vary greatly and there are no universal criteria for adjudicating between them In considering this problem relativism suggests that what is true or right can only be determined within variable contexts of assessment This book brings together articles published in the International Journal of Philosophical Studies over a period of 17 years as well as in a Special Issue of the journal published in 2004 The chapters in Section I discuss some of the main forms of relativism Section II sheds light on the different motivations for relativism assessing their strengths and weaknesses Section III provides a detailed examination of the vexed question of whether Ludwig Wittgenstein in his later work supported relativism The varied responses to this important question shed light on the issues discussed in Sections I and II This collection is a lively and engaging resource for scholars interested in the crucial impact relativism has had on the way we think about the meaning of truth and what is right and wrong The chapters in this book were originally published in the International Journal of Philosophical Studies

Pantheism and Ecology Luca Valera, 2023-11-14 This book provides a comprehensive overview of the relationship between pantheism and ecology particularly considering different cultural approaches and diverse religious theological and philosophical traditions Environmental ethics arises from the dangerousness and harmfulness of human beings with respect to nonhuman species and more generally with respect to the environment A common starting point for

environmental ethics standpoints is that human beings are responsible for damaging nature. The famous four laws of ecology drafted by Barry Commoner precisely express this guilt on the part of human beings who very often voluntarily violate the behavioral indications that emerge from nature itself. These aspects concern environmental ethics outlooks. Eco theology then takes a further step: not only do we damage the ecosystem but also, as many authors suggest, when we humans destroy the natural world we are wounding God. Such an idea implies a possible coincidence of God with the natural world or the ecosystem. From this assumption different questions may emerge: what is the kind of coincidence between God and the natural world? Are God and the ecosystem coextensive? If so, are we re-sacralizing the natural world and grounding intrinsic values in theological postulates and statements? These questions lead us to reconsider the cosmological assumptions that ground our environmental judgements from theology to different religious traditions and cultures to philosophical worldviews. In particular, we will focus on the cosmological assumptions of pantheism, considering its differences with panentheism, discussing the symmetrical or asymmetrical relationships between God and the finite ways in which God manifests Godself. In this regard, the book is divided into three main parts: in the first part, the question of pantheism is approached from different traditions and with a special focus on the main thinkers in the history of thought from Greek Stoicism to the present day. In the second part, some current ecological concerns are considered in relation to pantheistic cosmology; the authors will deepen issues from the discussion of the different pan-conceptions to the problem of evil to Anthropocene. Finally, in the third part, the different chapters will focus on ethical issues in the field of the current environmental crisis with a huge connection with the pantheistic cosmologies. This book is oriented to a wide public interested in environmental issues and looking for an approach from different cultures and traditions. Evidently, due to its academic nature, this book is also intended to be a great support for researchers interested in eco theology and more specifically in the relationship between pantheism and ecology. It is not in this sense a classic book on environmental ethics but a book that delves into the fundamentals of environmental philosophy privileging the Ibero American approach.

Teachers Matter - But How? Ninni Wahlström, Daniel Alvunger, Daniel Sundberg, 2019-12-18. Global processes are transforming educational policy around the world in complex ways with different implications for different local arenas. Over the last two decades, a global neoliberal policy paradigm has emerged, placing the teacher at its centre. Two well-known examples are the OECD report on education and training policy *Teachers Matter* and the McKinsey Company report entitled *How the World's Best Performing School Systems Come Out on Top*. It now seems more important than ever to highlight some alternatives that might contribute to a broader understanding of the meaning of being a teacher. In a time of standardised performance and accountability, this special issue raises critical questions about the space for teachers' agency and teachers as curriculum agents. The different articles from some of our most distinguished researchers in the field provide essential perspectives on the question of where, when, and how teachers matter. Our interest is not primarily to understand the scope of teachers' agency but rather to understand what becomes important for teachers in

their everyday activities such as teaching students handling educational norms and rules working in a local as well as a global society etc A common theme throughout the articles is that teachers matter in spaces where they can act as moral subjects in their profession in the present drawing on collective and individual experiences of the past whilst imagining a desired future This book was originally published as a special issue of the Journal of Curriculum Studies Transforming Literacy Robert P. Waxler, Maureen P. Hall, 2011 Focuses on enlarging teachers understanding of how reading and writing can change lives and how the language arts can contribute significantly to and change educational processes in the twenty first century **The Cristos yacentes of Gregorio Fern?ez** Ilenia Col?n Mendoza, 2017-07-05 Analyzing seventeenth century images of the dead Christ produced by Gregorio Fern ez author Ilenia Col endoza investigates how and why the artist and his patrons manipulated these images in connection with the religious literature of the time to produce striking images that moved the faithful to devotion In so doing she contributes new findings to the topic of Spanish sacred sculpture The author re examines these sculptures not only in the context of a larger sculptural group but also as independent sculptures that were intended as powerful aids to contemplation and devotion as was prescribed by the writings of San Juan de la Cruz and Luis de Granada Combining study of the sculptural works with that of liturgical sources she reveals the connection between the written word and the sculpted work of art Through this interdisciplinary approach the author links Fern ez s sculptural program with the strategic objectives of major patrons of the period such as the Duke of Lerma and King Philip III of Spain both fervent defenders of the Catholic faith
