

MICROS® Workstation 5A Point-of-Sale Benefits:

- Extremely durable
- Fast, easy software installation
- Quick replacement process
- Low power usage

For Colleges and Universities

Overview

The MICROS® Workstation 5A point-of-sale (POS) terminal combines the high performance and reliability CBORD® customers have come to expect. Featuring a 15" bright color touch screen display, solid-state design, and a multitude of peripheral options, the Workstation 5A is ideal for college dining environments.

Latest Technology

Instead of a hard drive common in PC-based POS terminals, the Workstation 5A uses internal solid-state flash storage and a removable compact flash card. The Intel Atom N450 processor and other internal components were selected for their reliability and low power usage. In addition, the Workstation 5A has a screen-saver function to reduce power consumption and preserve the life of the LCD touch screen.

MICROS® Workstation 5A Point-of-Sale

The Workstation 5A comes with Microsoft Windows CE 6.0 R3 preinstalled. This provides a number of advantages, such as lower cost and less maintenance than desktop operating systems, as well as remote and unattended operating system upgrades.

Fast and Easy Installation

The Workstation 5A arrives preloaded with the MICROS Client Application Loader (CAL), a revolutionary embedded software update agent that automates and simplifies software installation and maintenance. When booted up, the Client Application Loader seeks out the MICROS server and generates a list of workstations. Simply choose the workstation's identity, and CAL does the rest—downloading the application and configuration information.

Quick Replacement

A removable compact flash card stores all system configuration, the POS application, and offline transaction totals. In the event of a hardware failure, simply remove the compact flash card from the disabled unit and place it in a replacement unit. No reconfiguration is required.

The Workstation 5A is also equipped with a Factory Recovery tool that allows a technician to quickly and easily restore a workstation to factory-fresh configuration in less than two minutes.
