Smartphone Elizabeth Woyke, 2011-05-10 A technology reporter's behind-the-scenes history of the device that has taken over our lives. How have smartphones shaped the way we socialize and interact? Who tracks our actions, our preferences, our movements as recorded by our smartphones? These are just some of the questions that Elizabeth Woyke, a journalist who has covered the industry for Bloomberg Businessweek, Forbes, and MIT Technology Review, addresses in this book. Including photos and an in-depth look at the early decades of mobile communication, *The Smartphone* offers not only a step-by-step account of how smartphones are designed and manufactured but also a bold exploration of the darker side of this massive industry, including the exploitation of labor, the disposal of electronic waste, and the underground networks that hack and smuggle smartphones. Featuring interviews with key figures in the development of the smartphone and expert assessments of the industry's main players—Apple, Google, Microsoft, and Samsung—*The Smartphone* is the perfect introduction to this most personal of gadgets. Your smartphone will never look the same again. The author does a good job explaining the relationships among the makers, carriers, and developers, and she delivers an engrossing chapter on design trends. Kirkus Reviews

Universities and Regional Economic Development Paul Benneworth, 2018-09-03 In a knowledge-based economy, universities are vital institutions. This volume explores the roles that universities can play in peripheral regions, contributing to processes of regional economic development and innovative growth. Including a series of case studies drawn from Portugal, Norway, Finland, the Czech Republic, Estonia, and the Dutch-German border region, this will be the first book to offer a comprehensive comparative overview of universities in European economically peripheral regions. These studies seek to explore the tensions that arise in peripheral regions where there may not be obvious matches between university activities and regional strengths. Aimed at academics, policy makers, and practitioners working on regional innovation strategies, this volume brings a much-needed sense of realism and ambition for all those concerned with building successful regional societies at the periphery of the knowledge economy.

Technology is the means to satisfy our curiosity or even our desire for self expression We are taking photos machine gun style with our smartphones and choose the few to share As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years He gave some boring answer about Moore s Law but the real answer is that computers are in their teenage years They are growing and growing They will not always do so So too the technology industry is in a state of rapid change I see the shift to smaller devices as a new paradigm smashing some businesses and growing others into giants Their stories are here in the news In short here are predictions for what won t and will happen in 2015 for the mobile technology industry breakdowns of marketshare figures on the horse race aspect of the business chapters on Apple Samsung Google Microsoft Nokia Blackberry Amazon Yahoo news about social media giants Facebook Twitter Google LinkedIn Foursquare SnapChat and the carriers themselves Verizon AT T Sprint and T Mobile You can also review my 2014 mobile predictions and see my track record on predictions Finally there are some essays on how all this mobile tech is figuring into our lives I ve divided the news into the subjects it covers but also put in the appendix all the news as it came out in chronological ordering You can read the firehose of events in the appendix or just read about one topic at a time in the earlier chapters
