First Published in 2017 In this book Dr Laurie Graham Dodge shares some important fundamnetals of introductory statistics
At its core statistics is a branch of mathematics It s a collection of tools that help us organize and make sense of information
Unfortunately most tools are interesting only if we have an interesting use for them One of the authors major goals in writing
this book is to provide you with interesting examples that illustrate many of the important uses of statistics **Rethinking**
Grading Cathy Vatterott,2015-07-13 Grading systems often reward on time task completion and penalize disorganization and
bad behavior Despite our best intentions grades seem to reflect student compliance more than student learning and
engagement In the process we inadvertently subvert the learning process After careful research and years of experiences
with grading as a teacher and a parent Cathy Vatterott examines and debunks traditional practices and policies of grading in
K 12 schools She offers a new paradigm for standards based grading that focuses on student mastery of content and gives
concrete examples from elementary middle and high schools Rethinking Grading will show all educators how standards
based grading can authentically reflect student progress and learning and significantly improve both teaching and learning
Cathy Vatterott is an education professor and researcher at the University of Missouri St Louis a former middle school

the most contentious part conjuring up the most intense emotions and heated disagreements Vatterott is also the author of

Focus Review ,2004 *Embracing Reason* Daniel Chazan,Sandra Callis,Michael Lehman,2009-12-16 This book tells a

single story in many voices about a serious and sustained set of changes in mathematics teaching practice in a high school and how those efforts influenced and were influenced by a local university It challenges us to rethink boundaries between theory and practice and the relative roles of teachers and university faculty in educational endeavors Leadership for Low-Performing Schools Daniel L. Duke, 2015-01-15 No greater challenge faces our society than improving the educational opportunities for millions of young people trapped in chronically low performing schools Overcoming this challenge requires talented and dedicated school leaders whose knowledge and skills extend far beyond what is covered in conventional principal preparation programs This book draws on extensive research by the author and others on the actions needed to turn around low performing schools First however the book examines the personal qualities needed to undertake the turnaround process Following chapters provide guidelines on diagnosing the school based causes of low achievement and developing a school turnaround plan The author focuses on the importance of continuous planning a departure from standard practice A major portion of the book is devoted to examples of first order and second order strategies for raising achievement Specific recommendations for launching the turnaround process and sustaining gains beyond the first years of turnaround are provided The concluding chapter addresses the role of school districts in supporting school based turnaround efforts
